Introduction

AppJetty provides effective solution in the form of Delivery Date Scheduler which is helpful for entrepreneurs to easily deal with order management process.

An ideal extension for customers which allows them to select the date on which they want to receive delivery of product. Admin can disable week off days and time slot which won't allow customers to choose those days and time for delivery.

Benefits of Delivery Date Scheduler

- Makes it convenient to manage delivery schedules
- Effectively displays the delivery date with order information
- Delivery Date Calendar to view the date/days wise orders
- Enables admin to consolidate order management processes
- Allow to select the Delivery date option when min. order value is exceeded
- Manage the Delivery Date option on Cart page
- Manage the holidays and Blackout
- Exclude Holidays from processing days
- Display timer on specific products
- Manage same day delivery with additional charge
- Create seamless shipping experience for customers
- Save a lot of time and money for delivery

Prerequisites

- Admin should have a Magento Account.
- Admin should have configured stores.

Installation & Activation

Installation Steps

Step 1:

For Windows OS:

- Go to <your Magento install dir>/app/code. Under that, create the folders using following hierarchy:
 - Biztech
 - Delivery Date Scheduler
 - Deliverydatepro

For Linux OS:

- Enter the following commands keeping their order:
 - `cd <your Magento install dir>/app/code`
 - `mkdir -p Biztech/Deliverydate`
 - `mkdir -p Biztech/Deliverydatepro`
- After this, find the Download Zip and extract all files and folders in Biztech/Deliverydate. and Biztech / Deliverydatepro

Step2:

- After the successful installation you have to run the command on Magento2 root directory-“php bin/magento setup:upgrade”.
- If you see blank page or permission error, go to Terminal (Linux)/ Command Prompt (Windows).
 - `cd [magento root directory][var]`
 - Run the following command
 - `$ chmod -R 777 *`

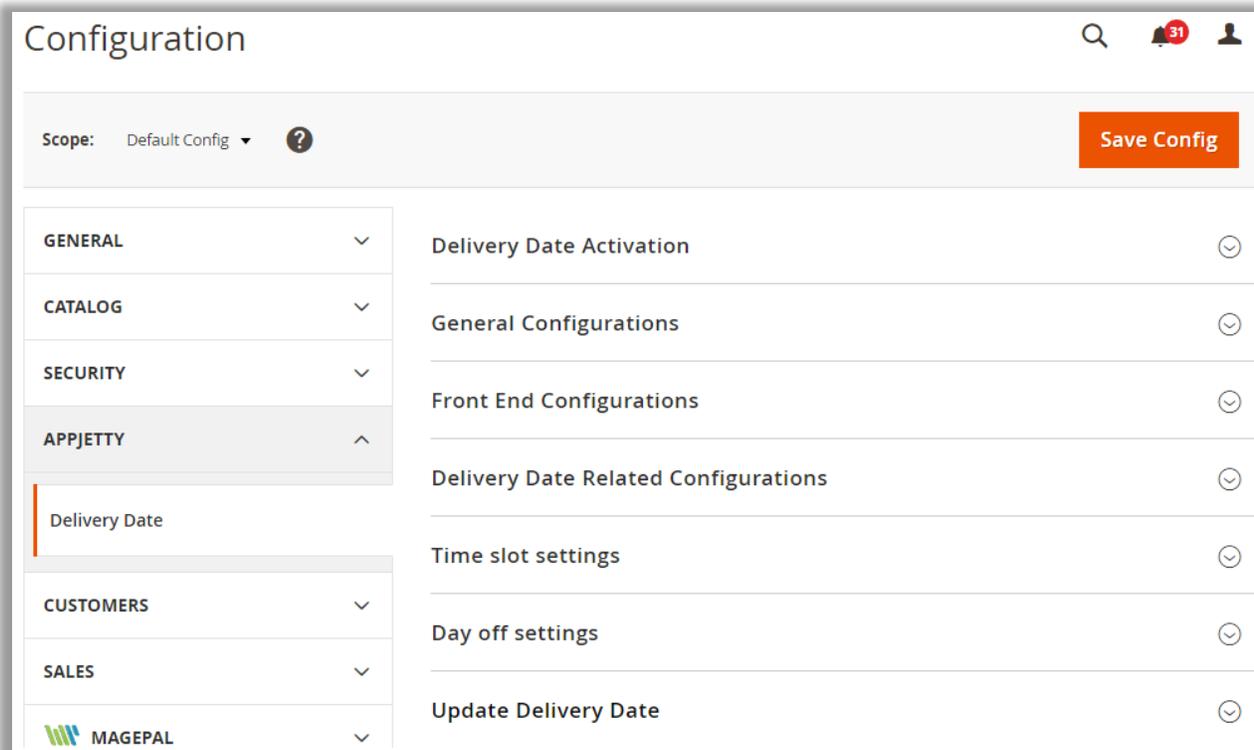

Step3:

- After running the command, log into the admin panel and clear the Cache. Go to **SYSTEM -> Tools (section) -> CACHE MANAGEMENT** to clear the cache.

<input type="checkbox"/>	Cache Type	Description	Tags	Status
<input type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged	CONFIG	DISABLED
<input type="checkbox"/>	Layouts	Layout building instructions	LAYOUT_GENERAL_CACHE_TAG	DISABLED
<input type="checkbox"/>	Blocks HTML output	Page blocks HTML	BLOCK_HTML	DISABLED
<input type="checkbox"/>	Collections Data	Collection data files	COLLECTION_DATA	DISABLED
<input type="checkbox"/>	Reflection Data	API interfaces reflection data	REFLECTION	DISABLED
<input type="checkbox"/>	Database DDL operations	Results of DDL queries, such as describing tables or indexes	DB_DDL	DISABLED
<input type="checkbox"/>	EAV types and attributes	Entity types declaration cache	EAV	DISABLED
<input type="checkbox"/>	Customer Notification	Customer Notification	CUSTOMER_NOTIFICATION	DISABLED

Step4:

- After the successful installation, you can see the “Delivery Date” under APPJETTY EXTENSIONS tab inside **STORES -> CONFIGURATION**.

Installation via Composer

Step 1:

- Create a new folder on your preferable server path. Add Extension zip archive into the created folder.

Step 2:

- Use Your SSH details to connect to your server. After connecting to the SSH, change your working directory with the one of your Magento setup path using below command.

```
cd /PATH/TO_YOUR_MAGENTO_SETUP_PATH
```

Step 3:

- Now you have to define the folder with the extension's archive as a repository for composer reference. For this, run the Composer command:

```
composer config repositories.biztech artifact /ABSOLUTE_PATH_TO_ZIP_Archive_FOLDER/
```

- For Example:

```
composer config repositories.biztech artifact /Packages/Biztech/
```

After executing this command, it will automatically add Repository Details in composer.json file.

Step 4:

- Perform the following command for installation of the module:

```
composer require biztech/Delivery date
```

Step 5:

- After successful installation using the above command you can verify the module status using the below command:

```
php bin/magento module:status
```

You can check newly added module in the List of disabled modules.

Step 6:

- Now you can upgrade your setup using below command.

```
php bin/magento setup:upgrade
```

It will enable the module and it should be doing the automated process required by Magento.

Step 7:

- You can now compile the modules using below command.

```
php bin/magento setup:di:compile
```

Step 8:

- In case if you have to update our extension from a composer you can use the below command:

```
composer update biztech/Delivery date
```

But before using that command you should have placed the latest Extension zip archive into the **/ABSOLUTE_PATH_TO_ZIP_Archive_FOLDER/**

- After executing the above command your module is updated and now you just have to run the upgrade command same as step 6 and compile command same as step 7.

Delivery Date Configuration

Extension Activation

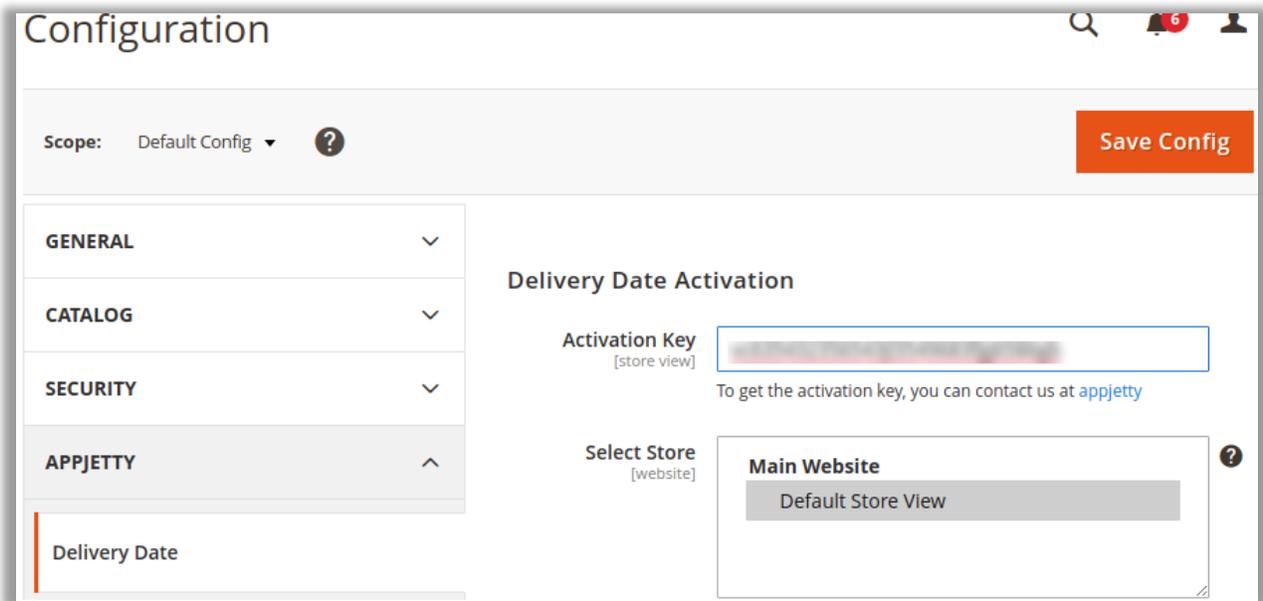

- Get the activation key from the Order Confirmation Mail. OR
- Login to your AppJetty Store account then go to Downloadable options and copy the activation key for the Delivery Date Scheduler extension.

Activate your extensions

- Log into Magento 2Admin Panel and go to **Store -> Configuration -> Appjetty Extensions /Delivery date Activation** and enter the activation key in the **'Activation Key'** field for the Delivery Date Scheduler extension then click the **'Save Config'**.

Select Websites

- When you enter and save the key it will be verified on our server and you can select the websites where you need to use the Delivery Date Scheduler extension. Click the **'Save Config'** button after making your selections.

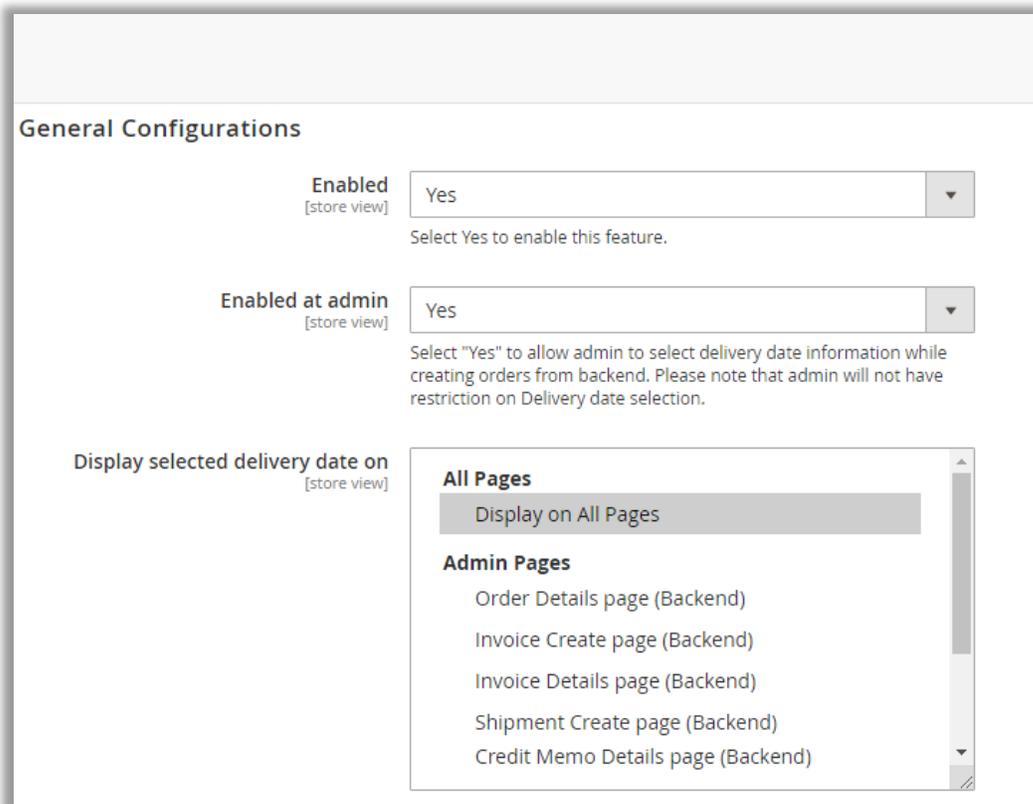

- You are now ready to use the Delivery Date Scheduler extension. Now, Delivery Date Scheduler got activated! You just must set configurations.

Configuration

General Configuration

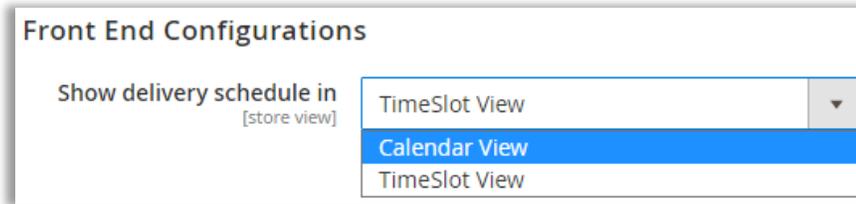

Please follow the below steps to enable and configure the “Delivery Date Scheduler”.

- Go to **Store -> Configuration**. In the left column you will see the tab **AppJetty Extensions -> Delivery Date**.
 - **Enabled:** Select ‘Yes’ to enable the Delivery Date extension. The extension is disabled by default.
 - **Enabled at Admin:** Select ‘Yes’ to let admin select the delivery date. This selection will be done at the time of creating orders from the backend.
 - **Display Selected Delivery Date On:** Select pages on which you want to display selected delivery date. It can be on different admin as well as front end pages.

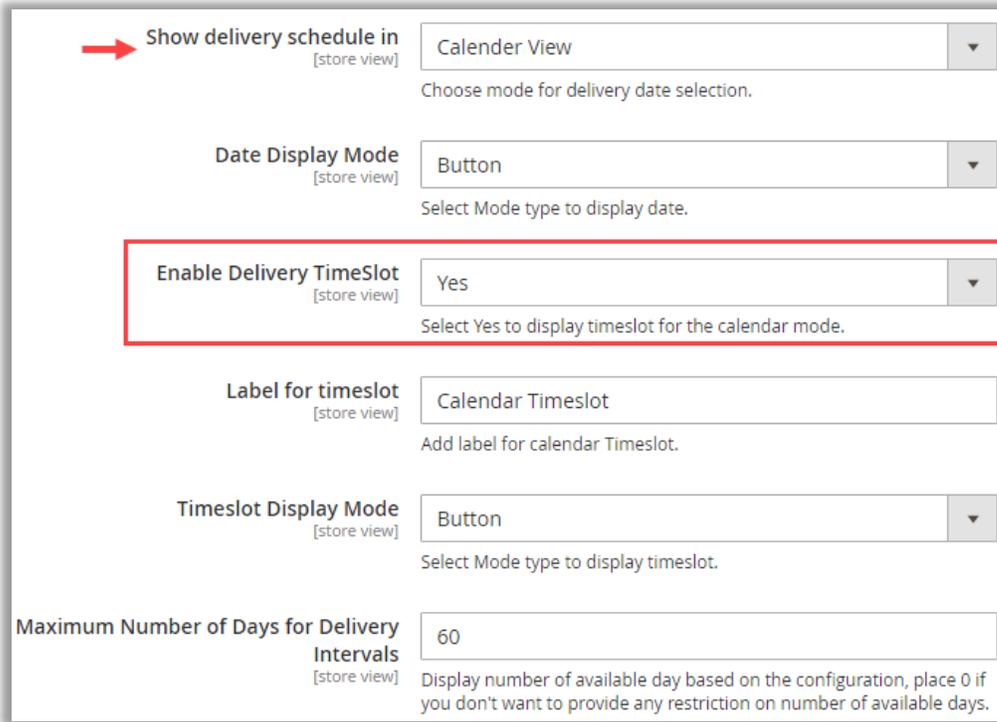

Frontend Configurations

- Select and configure the required options for Front End.
 - **Show delivery schedule in:** Set 'Calendar View' to display calendar and set 'Time Slot View' to display time slots for delivery date selection.

- If you have selected the **Calendar View**, the follow option will available:
 - **Date Display Mode:** Select the relevant mode to display the date. There are four different modes are provided: **Calendar, Radio Button, Dropdown & Button.**

- If you have selected Yes to the **Enable Delivery TimeSlot**, the following option will available:
 - **Label for timeslot:** Insert a 'label' for a calendar timeslot.
 - **Timeslot Display Mode:** Select the relevant mode to display the Timeslot from the provided modes: **Radio Button, Dropdown & Button.**
 - **Maximum Number of Day for Delivery:** Inset the days (in months) to define number of days you want to make available for selection as delivery date to your customers.

- The following options are **common** for the “Calendar View” and “TimeSlot View”:
 - **Make Delivery Date Mandatory:** Set ‘Yes’ to make delivery date as required field. But if you select ‘No’, you can provide the Pre-selected Delivery Date:
 - **Pre-Select Default Delivery Date:** Enable this option to display the first available delivery date selected in the date picker.
 - **Pre-Select Delivery Date After:** Insert how many days are required to process the order and ship it.

The screenshot shows three configuration options in a list:

- Make delivery date mandatory** [store view]: A dropdown menu with 'No' selected. A red box highlights the 'No' option. Below it is the text: "Select 'Yes' to make delivery date mandatory for customers."
- Pre-select default delivery date** [store view]: A dropdown menu with 'Yes' selected. A green arrow points to this option. Below it is the text: "Pre-select default delivery date option if date is not mandatory and date is not selected by the customer."
- Pre-select delivery date after** [store view]: A dropdown menu with '2 Days After' selected. A green arrow points to this option. Below it is the text: "Select number of days after order placement when default delivery date option should get selected in case no date is selected by the customer"

- **Label for Delivery Date:** Enter text to display as Label for delivery date on front end.
- **Label for Delivery Date Comments:** Enter text to display as Label for delivery date comment in frontend.

The screenshot shows two configuration options:

- Label for delivery date** [store view]: A text input field containing "Delivery Date". Below it is the text: "Add label for delivery date."
- Label for delivery date comments** [store view]: A text input field containing "Delivery Date Comments". Below it is the text: "Add label for delivery date comments."

USER MANUAL: Magento 2 Delivery Date Scheduler

- **Allow Customer to add Comment:** Select 'Yes' to enable the comment option for the customers. The customers will get the additional edit box to add any instruction/note.
- **Make Comments Mandatory:** Select 'Yes' to keep the comment as mandatory for the customers.

The screenshot shows a configuration panel with four settings:

- Allow customers to add comment** [store view]: A dropdown menu set to 'Yes'.
- Make comments mandatory** [store view]: A dropdown menu set to 'No'.
- Enable call me before delivery** [store view]: A dropdown menu set to 'Yes'. Below it is the text: "Select yes to show check box to enable call me before delivery option."
- Label for call me before delivery** [store view]: A text input field containing "Call me before delivery". Below it is the text: "Add label for call me before delivery."

- **Enable Call Me Before Delivery:** Select 'Yes' to enable call me before delivery option.
- **Label for call me Before Delivery:** Enter text to display as label for call me before delivery on frontend.
- **Show Additional Info:** Select 'Yes' to display additional information to customers.
- **Additional info for Customers:** You can add custom message to notify customers if any special instruction is there.

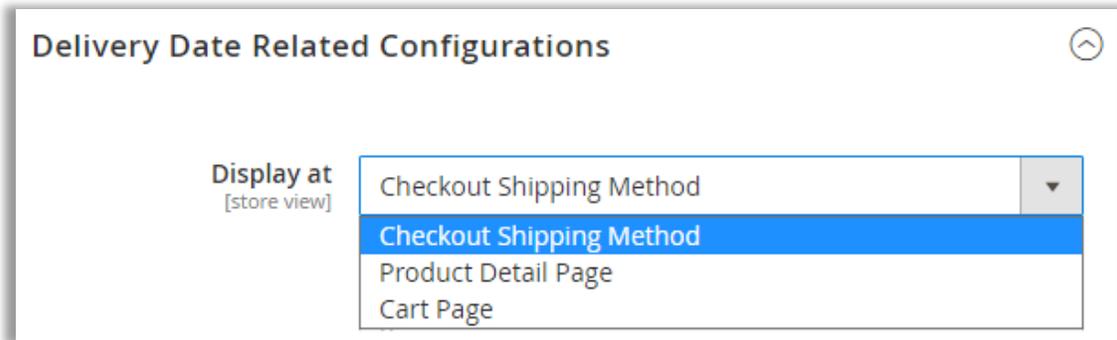

The screenshot shows a configuration panel with four settings:

- Show additional info** [store view]: A dropdown menu set to 'Yes'. Below it is the text: "Select Yes to display additional information to customers."
- Additional info for customers** [store view]: A text area containing the message: "Please choose your preferable future delivery time for current #order."
- Date format** [store view]: A dropdown menu set to 'd/M/Y'. Below it is the text: "Select date format, to be displayed on frontend and backend."
- Time format** [store view]: A dropdown menu set to 'g:i a'. Below it is the text: "Select time format, to be displayed on frontend and backend."

- **Date Format:** Defined date format will be displayed in frontend and admin panel. i.e. d/m/y, d-m-y etc.
- **Time Format:** Define time format which will be displayed in frontend and admin panel. i.e. g:i a or H:i:s

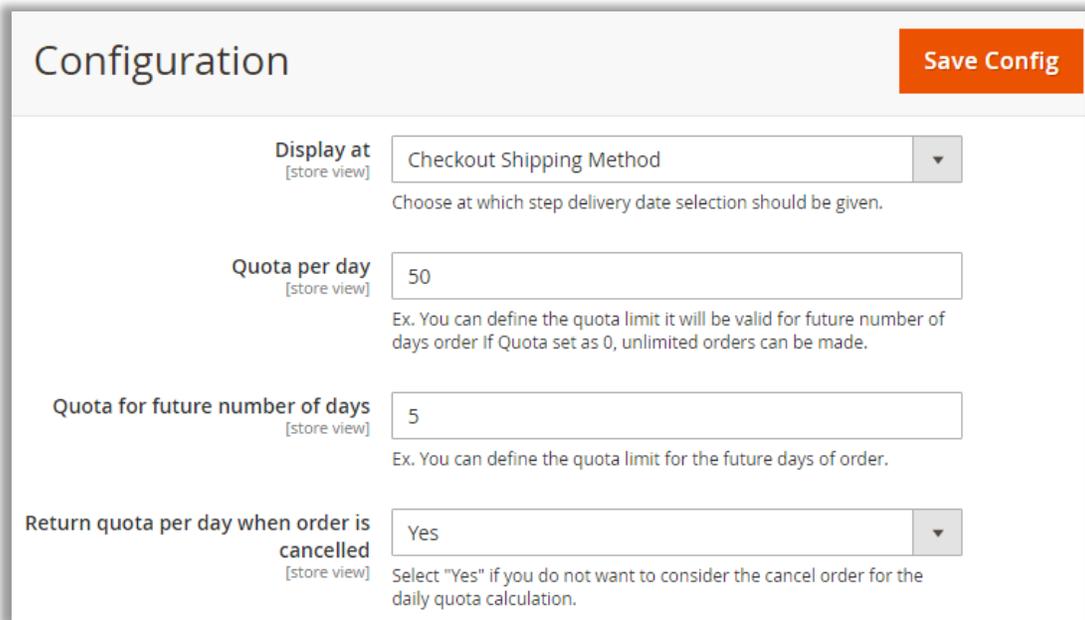

Delivery Date Related Configurations

- **Display At:** Select page option on which you want to provide selection of delivery date. It can be either on the **Checkout Shipping Page**, on the **Product Detail Page**, or on the **Cart Page**.

Checkout Shipping Method

- If you have selected the “Checkout Shipping Method”, configure the following options:
 - **Quota Per Day:** Define order quota for a day, after that limit user will not be able to place delivery order for that day.

- **Quota for future number of Days:** Define the quota limit for the future days of order.
- **Return Quota Per Day When Order is Cancelled:** Select ‘Yes’ if you don’t want to consider the cancel order for the daily quota calculation.

USER MANUAL: Magento 2 Delivery Date Scheduler

- If admin has selected the Display at “Checkout Shipping method”, admin can select the **configure** the **Email** options:

The screenshot shows a configuration form with the following fields:

- Do you want email notification ?** [store view]: A dropdown menu with the value "Yes".
- Email Notification Period** [store view]: A dropdown menu with the value "1 Day Ago".
- Select Admin Email Template** [store view]: A dropdown menu with the value "Delivery Date Notification".
- Email notification id** [store view]: A text input field containing "dev1@gmail.com".
- Do you want email notification to be sent to the customer** [store view]: A dropdown menu with the value "No".

Below the last field, there is a note: "If same day delivery is enabled, then email reminder is not sent to the customers."

- Do You Want Email Notification?** : Select **‘Yes’** for getting email notification for shipment of an order on particular date.
- Email Notification Period:** Define days when you want to get email notification for order shipment.
- Select Admin Email Template:** Select the default template for Admin about delivery.
- Email Notification Id:** An email will be sent to inserted email id.

Note: You can define multiple email address by using comma separated.
E.g. , dev@yahoo.com

- Do you want email notification to be sent to the customer?** : Select **‘Yes’** to send email notification regarding the shipment of an order.

Note: If same day delivery is enabled, then email reminder is not sent to the customers.

The screenshot shows a configuration form with the following fields:

- Enable delivery date based on shipping method** [store view]: A dropdown menu with the value "Yes".
- Shipping Methods** [store view]: A list of shipping methods with checkboxes. The methods listed are:
 - Flat Rate** (Fixed)
 - Best Way** (Table Rate)
 - Free Shipping** (Free)

Below the list, there is a note: "For selected shipping methods only, delivery date selection will be available in the front on checkout page"

- Enable delivery date based on shipping:** Select **‘Yes’** to enable the shipping methods.
- Shipping Methods:** Select the Shipping method(s) from the list of available shipping methods.

- **Restrict Delivery Option Based on Cart Amount:** Select ‘Yes’ to enable the delivery date selection only when the **Cart amount** is **more** than inserted cart value in ‘Cart amount’.

The screenshot shows a configuration panel with a 'Save Config' button in the top right. It contains three settings:

- Restrict Delivery Option Based on Cart Amount** [store view]: A dropdown menu set to 'Yes'. Below it, text reads: 'If set as yes, delivery date selection will be disabled for customers whose cart value is less than specified amount'.
- Cart amount** [store view]: A text input field containing '100'. Below it, text reads: 'Enter minimum cart amount to display delivery date selection.'
- Enable delivery selection for multi addresses** [store view]: A dropdown menu set to 'Yes'. Below it, text reads: 'If set as yes, date selection is enabled for multiple shipping addresses'.

- **Cart Amount:** Insert the minimum cart amount to display the delivery date selection only when the Cart value exceeds than inserted value here.
- **Enable delivery selection for multi addresses:** If you allow customers to select the date for multiple addresses of the multiple orders, select ‘Yes’ to enable for multiple shipping addresses.

After configuring the above details, click on “Save Config” button.

Product Detail Page

- If admin has selected to display at “Product Detail Page”, **Product Category** option will appear:
 - **Delivery Date for Product Category:** Select ‘Yes’ to enable delivery dates selection at product level. This option would show up only when Product Detail Page is the option selected as the ‘Display At’ option.
 - **Product Category:** If above option is set as ‘Yes’, select category in which you want to provide option for delivery date selection.

The screenshot shows a configuration panel with two settings:

- Delivery date for category's products** [store view]: A dropdown menu set to 'Yes'.
- Product category** [store view]: A dropdown menu with a list of categories. The categories listed are: 'What's New', 'Women', '--- Tops', '--- --- Jackets', '--- --- Hoodies & Sweatshirts' (highlighted), '--- --- Tees', '--- --- Bras & Tanks', '--- Bottoms', '--- --- Pants', and '--- --- Shorts'.

Cart Page

- **Delivery Option Based on Cart Amount:** Select ‘Yes’ to enable the delivery date selection only when the **Cart amount** is **more** than inserted cart value in ‘Cart amount’.

The screenshot shows a configuration panel with a 'Save Config' button in the top right corner. The panel contains two main settings:

- Restrict Delivery Option Based on Cart Amount** [store view]: A dropdown menu is set to 'Yes'. Below it, a note states: 'If set as yes, delivery date selection will be disabled for customers whose cart value is less than specified amount'.
- Cart amount** [store view]: A text input field contains the value '100'. Below it, a note states: 'Enter minimum cart amount to display delivery date selection.'

- **Cart Amount:** Insert the minimum cart amount to display the delivery date selection only when the Cart value exceeds than inserted value here.
- After configuring the above details, click on “Save Config” button.

Common configurations (Checkout, Product & Cart pages)

- The following options are **common** for the “Checkout Shipping Method”, “Product Detail Page” & Cart Page:
 - **Include additional delivery charge:** Select ‘Yes’ to enable additional charge on delivery by configuring the delivery charges related options.
 - **Allow product based delivery charges:** Select ‘Yes’ to enable product based delivery charges individually.

The screenshot shows a configuration panel with three main sections:

- Include additional delivery charge** [store view]: A dropdown menu set to "Yes". Below it, a note states: "If set as yes, only then other delivery charges related configurations should be managed."
- Allow product based delivery charges** [store view]: A dropdown menu set to "Yes".
- Additional delivery charge** [store view]: A dropdown menu set to "Per Day Of Week". Below it, a note states: "Choose way of additional delivery charges to be applied".

Below the "Additional delivery charge" section, there is a sub-section titled **Per Day Of Week** [store view]. It contains a table with the following structure:

Sort	Day	Price	Action

An "Add day" button is located below the table. A red arrow points from the "Per Day Of Week" dropdown menu to the table header.

- **Additional delivery charges:** Select the delivery charge for ‘Same Day Charge’ or ‘Per Day of Week’ by adding a specific day for additional charge.
- **Per Day of Week:** Add a specific day for additional charge for delivery on that day.

This image shows a detailed view of the "Per Day Of Week" configuration table. The table has the following structure:

Sort	Day	Price	Action
1	Friday	1.5	

An "Add day" button is located below the table.

- **Order Processing Time:** Insert the day(s) to process and manage the order. If you have inserted **0 (Zero)**, it means the order will be provided on same day.
- **Delivery Options Level:** Choose at which step order processing time should be considered. Global or Product Level.

Note: If two products with different processing period are added in the cart, final delivery will be made based on higher processing time.

Order Processing Time [store view]
You can leave it blank or add value 0 for providing the same day delivery.

Delivery Options Level [store view] ▼
Choose at which step order processing time should be considered. If two products with different processing period are added in the cart, final delivery will be made based on higher processing time.

Enable Cut Off time [store view] ▼
Cut off time is that time after which same day order gets disabled.

Disable same day delivery after (Cut-off time) [store view] ▼ : ▼ : ▼

Enable product wise cut off [store view] ▼

Show same day delivery ends timer [store view] ▼
Select yes to display same day delivery ends timer on product page

- **Enable Cut Off Time:** Select 'Yes' to enable cut off time for orders. Cut Off time defines time after which orders made would be considered for next day.
- **Disable Same Day Delivery After (Cut Off):** Select time after which you want same day delivery to be disabled.
- **Enable product wise cut off:** Select 'Yes' to enable product wise cut off. Cut off will consider on product level for checkout, cart and product page
- **Show same day delivery ends timer:** Select 'Yes' to display the timer as per the Cut Off time.

- **Delivery Date for Customer Groups:** Select 'Yes' to enable delivery date for specific customer groups.
- **Customer Groups:** If selected yes in above option, you need to select customer groups for whom you want to provide delivery date selection.

Note: Multiselect option is available to select multiple groups.

The screenshot shows a configuration window with two main sections. The first section, titled "Delivery date for customer groups" with a "[store view]" label below it, contains a dropdown menu currently set to "Yes". The second section, titled "Customers groups" with a "[store view]" label below it, contains a multiselect list. The list includes the following options: "NOT LOGGED IN", "General", "Wholesale", and "Retailer". The "General" option is currently selected and highlighted with a grey background.

Product Level Delivery Date

- The following options are **common** for the “Checkout Shipping Method”, “Product Detail Page” & Cart Page:
 - Additional Delivery Charge: Insert the additional delivery charge on order for a specific product. If you keep it **0** (zero) *or* empty, no additional charge for the selected product will be added.
 - Order Processing Time: Insert the Number of days needed to prepare the order. Leave it blank to provide same day delivery.

The screenshot shows the configuration page for 'Joust Duffle Bag'. At the top, there are navigation buttons: 'Back', 'Add Attribute', and 'Save'. The main section is titled 'Delivery Date Options' and contains several input fields:

- Additional Delivery Charge [global]**: A text input field containing '\$ 5.00'. Below it is a description: 'Define additional delivery charge on order based on particular product. If you keep it 0 or empty, no additional charge based on product will be added.'
- Order Processing Time [global]**: A text input field containing '3'. Below it is a description: 'Number of days needed to prepare the order. Leave it blank to provide same day delivery.'
- Cut Off Hour [global]**: A dropdown menu with '6' selected.
- Cut Off Minutes [global]**: A dropdown menu with '0' selected.
- Cut Off Seconds [global]**: A dropdown menu with '0' selected.

- Insert the Cut Off Hour, Minutes & Seconds.

Time Slot Settings

- **Label for timeslot view table:** Default label that you would want to keep for timeslot selection.
- **Add no. of Delivery days:** Provide the no. of days for which you are going to provide delivery.
- **Minimum interval of hours between the order placing time and delivery time:** You can add the time interval in hours which will be the minimum gap between order placing and delivery time *i.e.* Customer will not be able to select the delivery time lees than the hours you have entered.
- **Add time slot:** Admin can add the time slot in sorting order by entering the fields for “Start time”, “End time” and “Price”. You can charge extra for specific time intervals under the price.

Day Off Settings

- **Day Off:** Select day when you don't provide shipment, so customer can't select that day.

- **Single Day Off:** Set and Disable single day offs (Festivals and national holidays). You can select date, month and year from the drop-down button as per required.

- **Period, from-To:** Set and Disable Dates for a given period. When you have holidays for a couple of days then you can disable those dates.

- **Exclude Holidays:** By selecting “Yes” here, all the enabled holidays from “Delivery Date → Manage Holidays” will be disabled for the date selection.

Exclude Holidays
[store view] No ▼
If set as Yes, all enabled holidays will be skipped from order processing day count

Exclude Holiday/Disable Days From Processing Day
[store view] Yes ▼
If set as Yes, all enabled holidays will be skipped from order processing day count

- **Exclude Holiday/Disable Days From Processing Day:** Disable the order processing on the holiday or off days and will not be counted as the processing days in delivery time.

Note: This configuration is only applicable if delivery period is selected from the checkout page and order shipment is not generated.

- After Configuring the Day off details, click on the **Save Config** button.

Update Delivery Date

- Customer can edit and update the desired delivery date for the order. As an admin, you can enable the Update Deliver Date option for the customers.
- **Allow customer to edit delivery date:** By selecting Yes, you can allow the customer to edit the selected delivery date once again and update the delivery date.
Note: Update delivery date is only applicable if the delivery period is selected from the Checkout Page and Order Shipment is not generated yet.
- **Rule Condition to allow editing:** Admin can define the rule option based on the selection of either **Order Status** or **Day**.

- **Order status can be rescheduled:** Select the Order status in which case the customers can edit the delivery date information.

- **Day:** If admin selected Day, the **Time interval to update day** will be available to select no. of days before that customers can edit the selected delivery date.

Update Delivery Date

Allow customer to edit delivery date [store view] Yes

If enabled then customer can edit delivery date from their account.
Note: This configuration is only applicable if delivery period is selected from the checkout page and order shipment is not generated.

Rule condition to allow editing [store view] Day

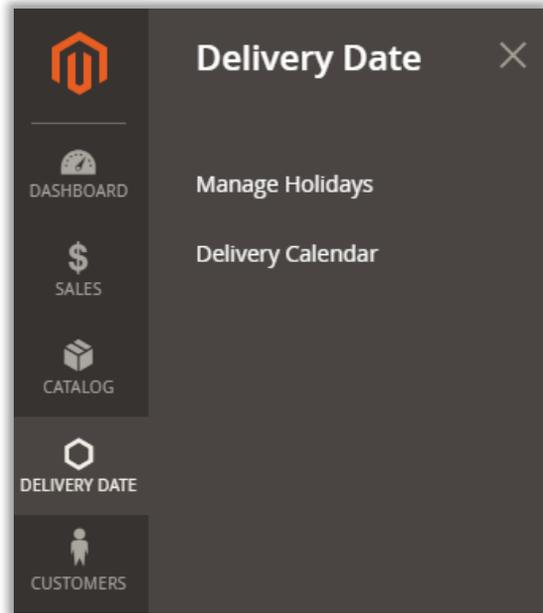

Define rule option based on which customer can edit delivery date.

Time interval to update day [store view] 1 day

Select number of days before the delivery day, in which customers can edit the selected delivery date.

Delivery Date

- From the Magento navigation pane, you will find the **Deliver Date** option there.
- Under the “Delivery Date” option, you can manage the Holidays and check the order details on the Calendar.

Manage Holidays

- Navigate to **Delivery Date** → **Manage Holidays** to add the upcoming holidays to manage the unavailable delivery dates.

Manage Holidays Add New Holiday

- You can filter and search the specific holidays, you can change status of the holidays with multiple selection.

USER MANUAL: Magento 2 Delivery Date Scheduler

- Click on the “Add New Holiday” button to add a new holiday detail.
 - **Holiday Title:** Insert the relevant name of the holiday. i.e., Independence Day
 - **Annual:** Select **Yes** if the holiday will occur every year.
 - **Day:** Insert the date.

The screenshot shows the 'Add New Holiday' form in the Magento 2 Delivery Date Scheduler. At the top right, there are navigation buttons: 'Back', 'Reset', 'Save and Continue Edit', and a prominent orange 'Save Holiday' button. On the left, a sidebar contains a 'HOLIDAY INFORMATION' section with a 'Holiday' link and an edit icon. The main form area is titled 'Holiday' and contains the following fields:

- Holiday Title ***: A text input field containing 'Memorial Day'.
- Annual ***: A dropdown menu with 'No' selected and 'Yes' highlighted.
- Day ***: A text input field containing '31'. Below it, a note reads 'Date range will be 1 to 31'.
- Month ***: A dropdown menu with 'May' selected.
- Year ***: An empty text input field.
- Status ***: A dropdown menu with 'Enabled' selected.

- **Month:** Select the month
 - **Year:** This option will appear only when you have selected “No” to Annual option. You need to insert the (current) year here.
- After selecting and inserting the details, click on the **Save Holiday** button. The added holiday will be added in the list.
 - From the delivery date selection, the customers will get the holiday dates disabled for selection.

Delivery Calendar

- Navigate to **Delivery Date** → **Delivery Calendar** to check the orders from the calendar view.
- You can easily check month-wise orders from the calendar view. You can check the previous month's orders ← and next month's orders →.

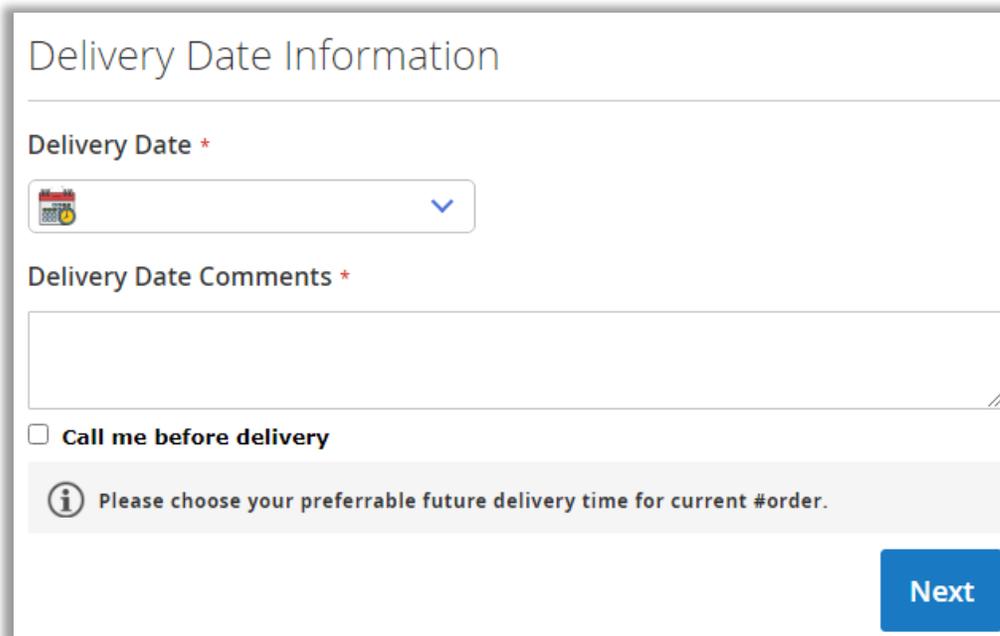

The screenshot shows the 'Delivery Date Calendar' interface. At the top, there is a search icon, a notification bell with '31', and a user profile icon. Below this is a navigation bar with '← 2021 Jan →'. The main area is a calendar grid with columns for days of the week (MON to SUN) and rows for dates. The grid contains order IDs for specific dates: 000000047 on Friday 15, 000000048 on Monday 18, 000000049 on Tuesday 19, 000000050, 000000051, and 000000052 on Wednesday 20, and 000000053 on Thursday 21. The date 28 is highlighted in orange.

MON	TUE	WED	THU	FRI	SAT	SUN
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15 000000047	16	17
18 000000048	19 000000049	20 000000050 000000051 000000052	21 000000053	22	23	24
25	26	27	28	29	30	31

Store View (Frontend)

Delivery Date Selection

- Once admin has configured the Delivery Date from the backend, the customers will get the delivery date option according to that configuration.
- If the admin has set the Delivery restriction option that the delivery option will be enabled only when the min. order value exceeds a certain defined value (amount), the customers will get the Delivery Date selection option only when that happens.

Delivery Date Information

Delivery Date *

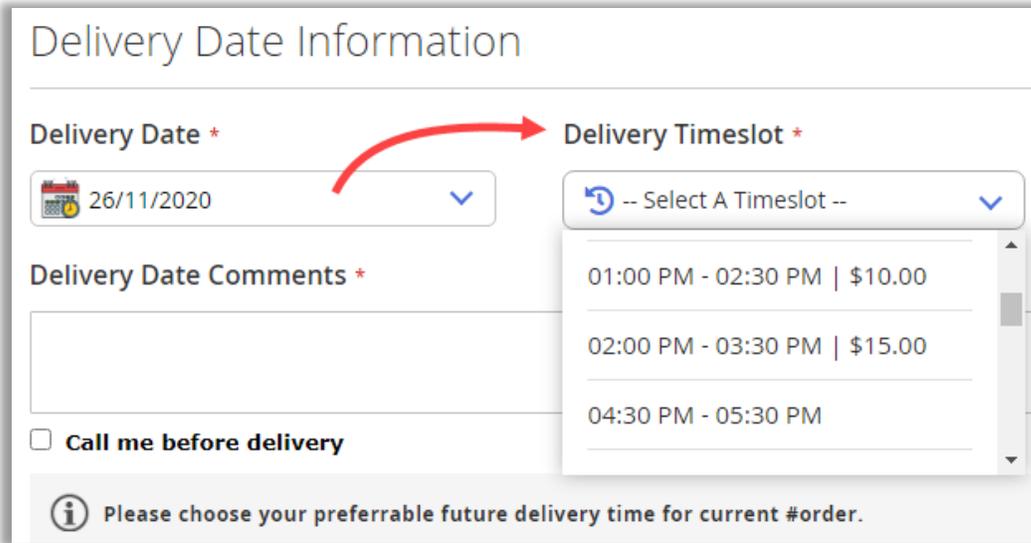

Delivery Date Comments *

Call me before delivery

Please choose your preferable future delivery time for current #order.

Next

- The date display will appear as per the selection in the “Date Display Mode” from the configuration. (Calendar, Radio Button, Dropdown or Button)
- Once the customer selects the Delivery Date, the Delivery Timeslot will also be enabled if admin has enabled from the Delivery Date configuration.

Delivery Date Information

Delivery Date * 26/11/2020

Delivery Timeslot * -- Select A Timeslot --

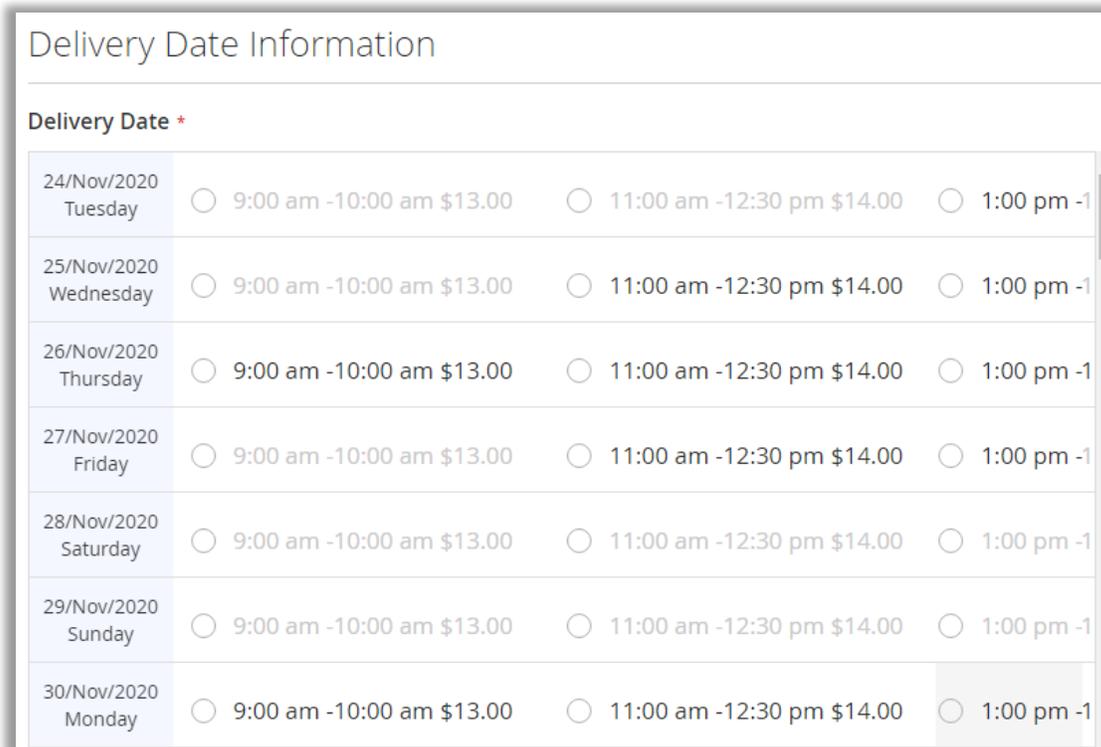

- 01:00 PM - 02:30 PM | \$10.00
- 02:00 PM - 03:30 PM | \$15.00
- 04:30 PM - 05:30 PM

Delivery Date Comments *

Call me before delivery

Please choose your preferable future delivery time for current #order.

- The time list in the Timeslot will appear as per the selection of the available timeslots and the selected Timeslot Display mode (Radio Button, Dropdown or Button).
- If admin has selected the **Timeslot View** in the “Show delivery schedule in”, your customer will get date wise all the time slots as shown below.

Call me before delivery: Yes

Edit Delivery Date

- Customer can **edit** the “delivery date” even after placing the order. Customer can navigate to the “Order View” from their account and under the Order information, they will find the **Edit** button to update the Delivery Date.

- Once the customer edited the Delivery date options, they must click on the Delivery Date button.

Note: The customer will get the Delivery Date options as per the backend configuration in the Delivery Date and if the order is shipped, the customer will not get the Edit delivery date option.

Date selection for Multiple Addresses

- If you have enabled the “Delivery Date selection for the multiple addresses” option from the Delivery Date configuration, the customers would be able to select the desired delivery date multiple addresses for their orders from the Checkout page.
- The customers will get the option of “Multiple Addresses” on the Shopping Cart page.

The screenshot shows a shopping cart with two items:

Item	Price	Qty	Subtotal
 Strive Shoulder Pack	\$32.00	2	\$64.00
 Joust Duffle Bag	\$34.00	1	\$34.00

Summary sidebar:

- Estimate Shipping and Tax
- Subtotal: \$98.00
- Tax: \$0.00
- Order Total: \$98.00
- Buttons: Proceed to Checkout, Check Out with Multiple Addresses (highlighted with a red box)

- By clicking on the “Check Out with Multiple Addresses” option, the customers will navigate to the “Ship to Multiple Addresses” page where the customers will get the option to select the different addresses for the different products (orders).

Ship to Multiple Addresses

Please select a shipping address for applicable items.

The screenshot shows a table for selecting shipping addresses:

Product	Qty	Send To	
Strive Shoulder Pack	1	Veronica Costello, afsef, sdffsf, Alabama 23444, United States	Remove item
Strive Shoulder Pack	1	Veronica Costello, 6146 Honey Bluff Parkway, Calder, Michigan 49628-7978, United States	Remove item
Joust Duffle Bag	1	Veronica Costello, test, tet, Gujarat 383001, India	Remove item

Buttons at the bottom:

- Go to Shipping Information (2)
- Back to Shopping Cart
- Update Qty & Addresses (1)
- Enter a New Address

- Once addresses are selected, click on the “Update Qty & Addresses” button, and go to the Shipping information page.

- Under the Shipping Method, the customers will get the **Delivery Date Information**. The customers can select the required Shipping Method and Deliver Date with its required details.

23	24	Orders(1)	Orders(1)	27	28	29
30						

Delivery Date Calendar

- Once the customers place the orders, the admin can view all the orders under the “Delivery Date Calendar.” For that, navigate to Delivery Date → Delivery Date Calendar from the Magento navigation pane.

The screenshot shows the 'Delivery Date Calendar' interface. At the top, there is a search icon, a notification bell with '31', and a user profile icon. Below the title is a navigation bar with '← 2021 Jan →'. The main area is a calendar grid with columns for days of the week (MON to SUN) and rows for dates (1 to 31). Order numbers are displayed in the following cells:

MON	TUE	WED	THU	FRI	SAT	SUN
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15 00000047	16	17
18 00000048	19 00000049	20 00000050 00000051 00000052	21 00000053	22	23	24
25	26	27	28	29	30	31

- From the calendar, you will get the order number detail as per the ordered date. By clicking on the order no., you will redirect to the order details page (Sales → Orders) from where you can check the order details and delivery date for the select order.

The screenshot shows the 'Order Details' page for order #00000053. At the top, there is a search icon, a notification bell with '31', and a user profile icon. Below the title is a navigation bar with buttons: '← Back', 'Cancel', 'Send Email', 'Hold', 'Invoice', 'Ship', 'Reorder', and 'Edit'. The main content area is divided into two columns. The left column has a sidebar with 'ORDER VIEW' and 'Information' (selected), along with links for 'Invoices', 'Credit Memos', 'Shipments', and 'Comments History'. The right column contains 'Order & Account Information'.

Order & Account Information

Order # 00000053 (The order confirmation email was sent)

QUERY VARIABLES

3. Delivery date information for date picker or timeslot in Product Details page.

Query:

```
{
  deliveryInformationAtProductPage(id: 1) {
    productId
    templateConfig {
      useTemplate
      deliverydateComments
      deliverydateLabel
      displayHtml
      showHtml
    }
    general {
      enabled
      disabledDates
    }
    calendar {
      options {
        buttonImage
        buttonText
        interval
        isRTL
        maxDate
        showAnim
        showButtonPanel
        showsTime
        dateDisplayMode
        getavailableDays {
          disable_value
          value
          day_id
          display_value
        }
      }
      enableTimeSlotForCalendar
      timeDisplayMode
      deliverydateSlotLabel
      imageUrl
    }
  }
}
timeslot {
  enabled_timeslots {
    delivery_date
```

```

row_heading
slots {
  disabled
  slot_id
  slot_value
  slot_value_html
}
}
timeslotTableLabel
}
}
}

```

```
