Introduction

AppJetty offers a mobility solution to your users in the form of MageMob Mobile App Builder and helps them to access your store and place orders through their mobile on the go.

You must have extension for store owners, which allows their customers to place orders from their mobile. It is easy to download and quite user-friendly for your customers. Your customers can view your store and entire features on their mobile and place orders anytime from anywhere the search.

Benefits of MageMob App Builder

- Allows your customers to carry your store with them anywhere.
- Extremely user-friendly, simple to manage by the merchants and easy to navigate by the end users.
- Increases customers outreach due to mobility and uniqueness of smart phone.
- Increases the overall bottom line of the business, benefiting the store owners.
- More satisfied customers due to store accessibility from iPhone and Android smart phones.
- Improves customer satisfaction and enhances online visibility of your business.
- Add-ons: Compatible with AppJetty's Zipcode Validator and Delivery Date Scheduler

Installation & Activation

Installation Steps

Manual Installation (Installing Magento 2 extension by copying code)

Step 1:

For Windows OS:

- Go to <your Magento install dir>/app/code. Under that, create the folders using following hierarchy:
 - Biztech
 - Magemobcart

For Linux OS:

- Enter the following commands keeping their order:
 - `cd <your Magento install dir>/app/code`
 - `mkdir -p Biztech/ Magemobcart`
 - After this, find the Download Zip and extract all files and folders in Biztech/ Magemobcart

Step 2:

- After the successful installation, you have to run the command on Magento2 root directory- “php bin/magento setup: upgrade” and “php bin/magento setup:di:compile”
- If you see blank page or permission error, go to Terminal (Linux)/ Command Prompt (Windows) and run the following command:
 - cd [magento root directory] [var]
 - run the following command
 - \$ chmod -R 777 *

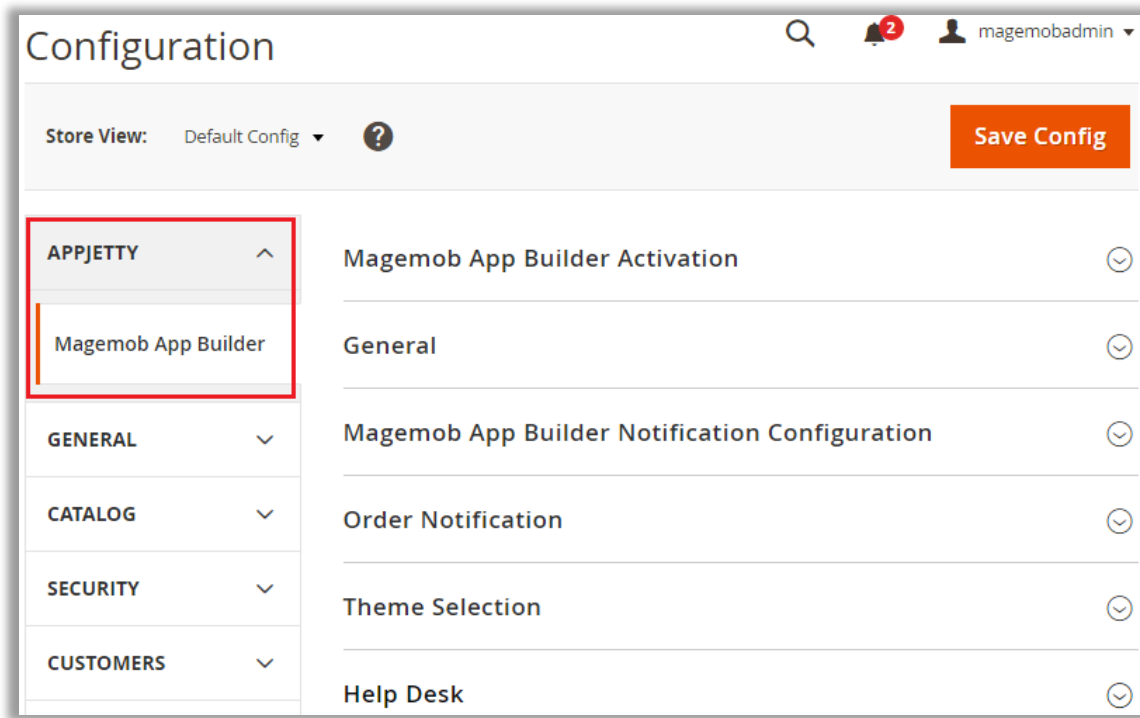

Step 3:

- After running the command, log into the admin panel and clear the Cache.
- Go to **SYSTEM -> Tools (section) -> CACHE MANAGEMENT** to clear the cache.

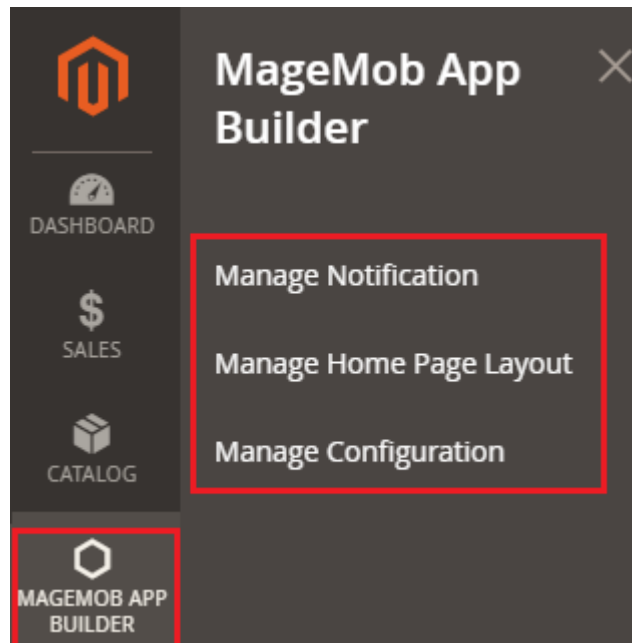

<input type="checkbox"/>	Cache Type	Description	Tags	Status
<input type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged	CONFIG	DISABLED
<input type="checkbox"/>	Layouts	Layout building instructions	LAYOUT_GENERAL_CACHE_TAG	DISABLED
<input type="checkbox"/>	Blocks HTML output	Page blocks HTML	BLOCK_HTML	DISABLED
<input type="checkbox"/>	Collections Data	Collection data files	COLLECTION_DATA	DISABLED
<input type="checkbox"/>	Reflection Data	API interfaces reflection data	REFLECTION	DISABLED
<input type="checkbox"/>	Database DDL operations	Results of DDL queries, such as describing tables or indexes	DB_DDL	DISABLED
<input type="checkbox"/>	EAV types and attributes	Entity types declaration cache	EAV	DISABLED
<input type="checkbox"/>	Customer Notification	Customer Notification	CUSTOMER_NOTIFICATION	DISABLED

Step 4:

- After successful installation, you can see the 'MageMob Mobile App Builder' under 'APPJETTY' tab inside STORES -> Configuration.

- You can also see MageMob Mobile App Builder in the drawer menu.

Magento Backend Configuration

Extension Activation & Other Configuration

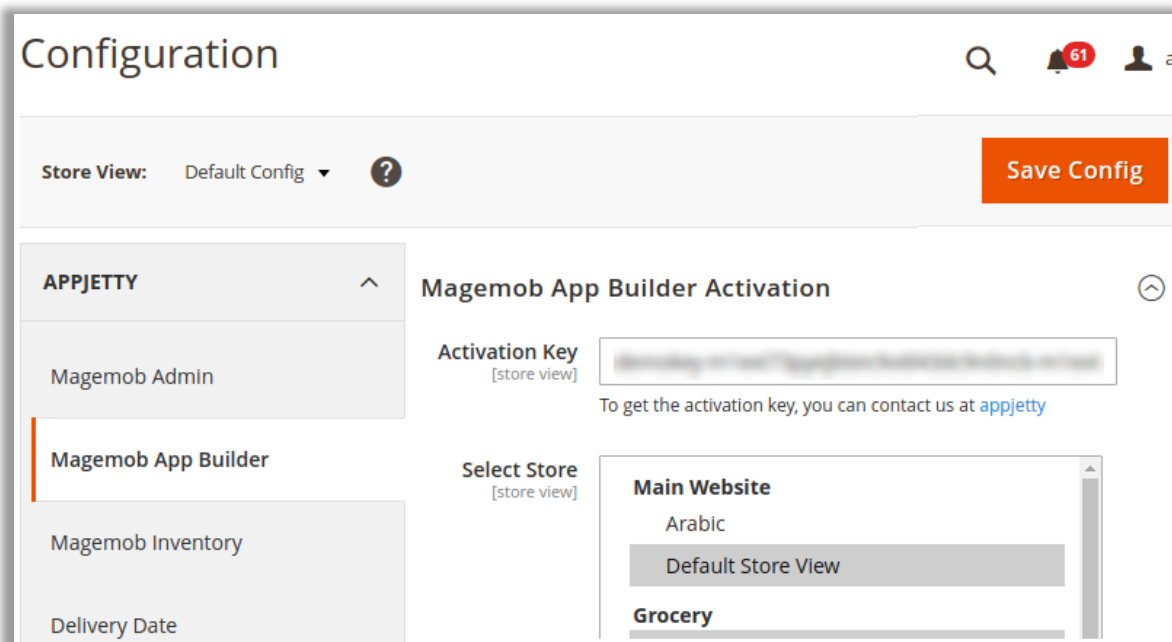

- By clicking on **Mange Configuration**, you can activate the extension, set general configuration, and insert Notification key for Android/iOS users.

Copy an activation key

- Copy the activation key from the Order Confirmation Mail. **OR**
- Log into your account at www.appjetty.com using the email and password you have provided at checkout process.
- Go to Downloadable Options and copy the activation key for the App Builder extension.

Activate the extension

- Log into Magento Admin Panel.
- Go to **STORES -> CONFIGURATION -> APPJETTY -> MageMob Mobile App Builder Activation** and enter the **Activation Key** for the App Builder extension then click the **Save Config** button.

Select Store

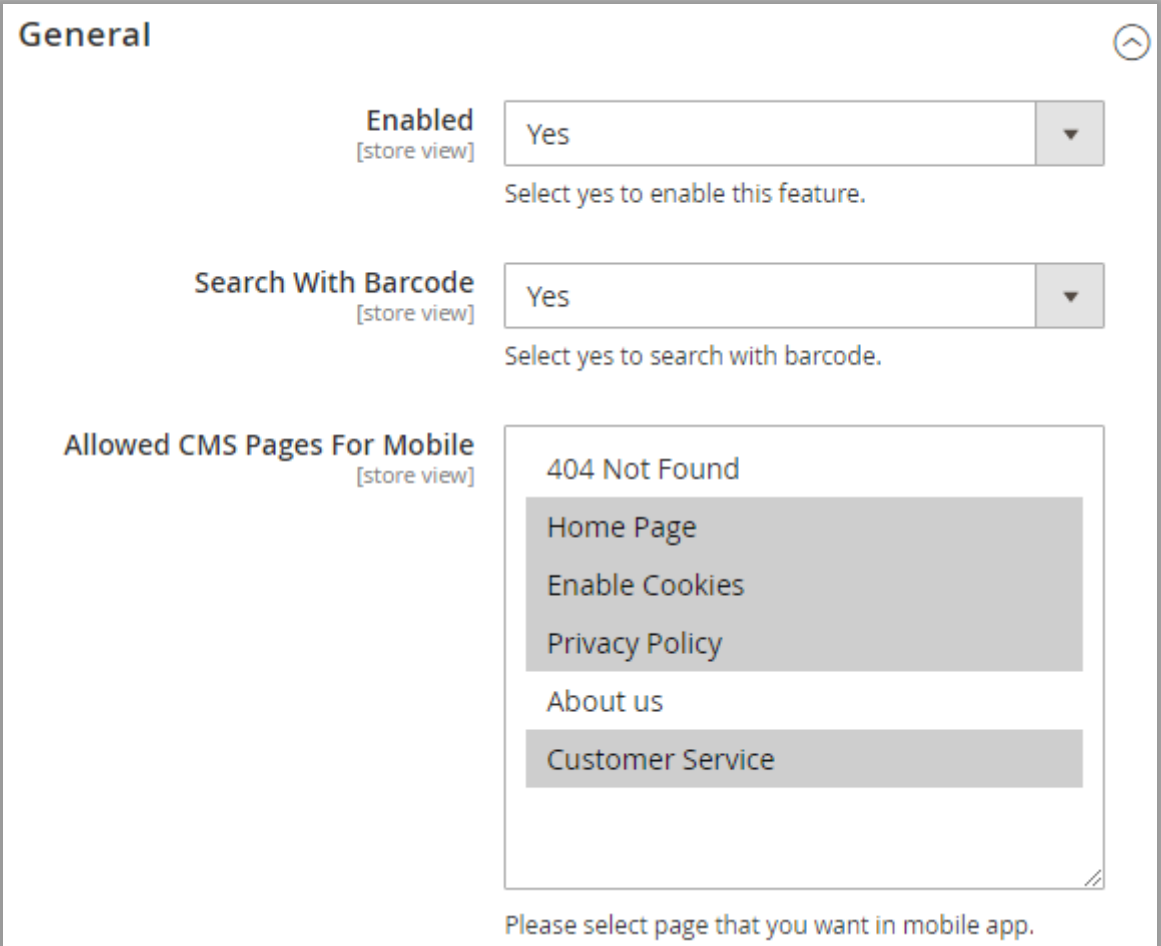

- When you enter and save the key it will be verified, and you can select the websites where you need to use the App Builder extension. Click the **Save Config** button after making your selections.
- Now, MageMob Mobile App Builder **Extension** got **activated**.

Other Configuration

Now, after activating the extension, you must set other configurations.

General Configurations

- **Enabled:** Select **Yes** to enable the MageMob Mobile App Builder extension. The extension is disabled by default.
- **Search with Barcode:** Select **Yes** to let your customers search products with barcode.
- **Allowed CM Pages For Mobile:** Select the CMS page to display in the App.

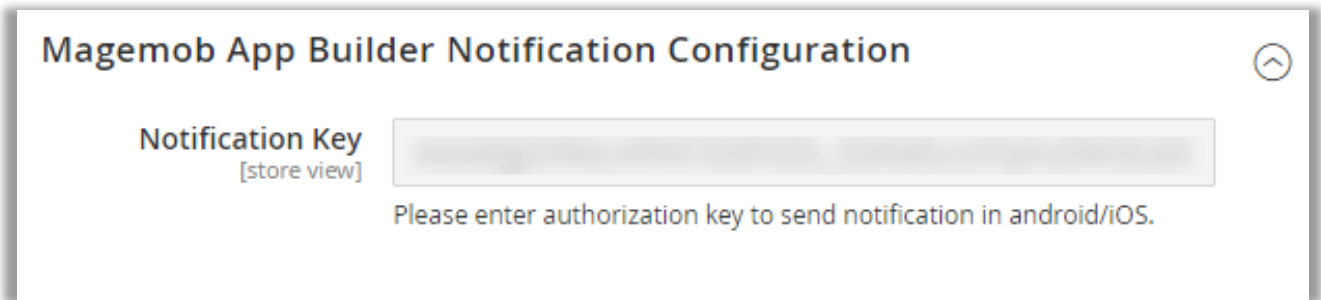

The screenshot shows the 'General' configuration panel for the MageMob Mobile App Builder extension. It contains three main settings:

- Enabled** [store view]: A dropdown menu set to 'Yes'. Below it is the instruction: 'Select yes to enable this feature.'
- Search With Barcode** [store view]: A dropdown menu set to 'Yes'. Below it is the instruction: 'Select yes to search with barcode.'
- Allowed CMS Pages For Mobile** [store view]: A list of CMS pages to choose from. The pages listed are: '404 Not Found', 'Home Page', 'Enable Cookies', 'Privacy Policy', 'About us', and 'Customer Service'. The 'Home Page' and 'Customer Service' options are highlighted with a grey background. Below the list is the instruction: 'Please select page that you want in mobile app.'

MageMob Mobile App Builder Notification Configuration

- **Notification Key:** Insert “authorization key” to send the notification to the Android/iOS users.

Choose OS
[store view] Both

Select OS in which you want to send notification.

Theme Selection

- **Theme Selection:** You can set look and feel of your MageMob application.
 - **Primary Color:** This will be the **base** color of the application.
 - **Secondary Color:** This will be the **background color** of all **buttons**.
 - **Background Color:** This will be the **background color** of the application.
 - **Button Text Color:** This will be the **text color** of buttons throughout the app.

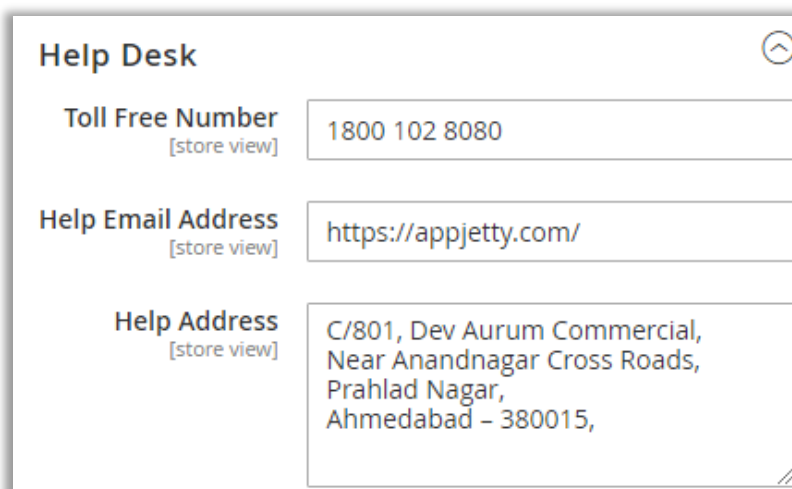

The screenshot shows a 'Theme Selection' configuration panel with a close button in the top right corner. It contains four settings, each with a label, a 'store view' indicator, a color selection box, and a description:

- Primary Color** [store view]: #b00000. Primary Color is set for all other related colors of the tool.
- Secondary Color** [store view]: #753d01. Secondary Color is set for all other related colors of the tool.
- Background Color** [store view]: #f9f9f9. Background Color is set for full background of the tool.
- Button Text Color** [store view]: #ffffff. Button Text Color is set for text of all buttons of the tool.

Help Desk

- **Help Desk:** Admin can display store details in the **Contact Us** page of MageMob App.

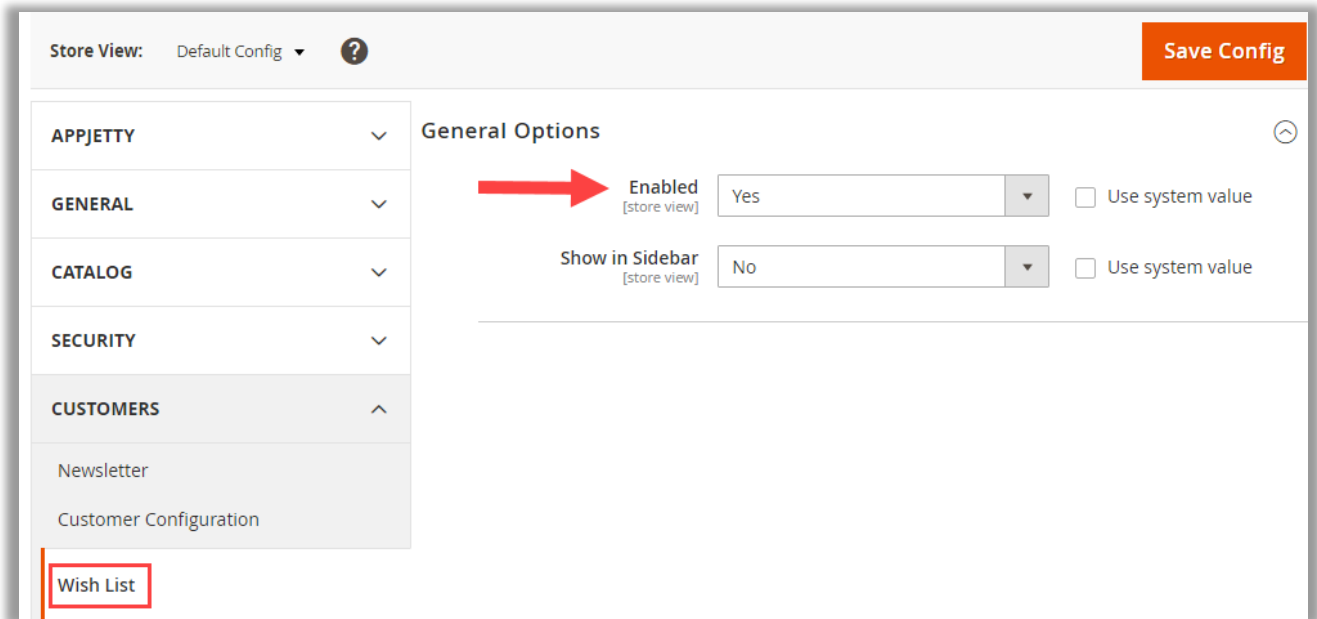

The screenshot shows a 'Help Desk' configuration panel with a close button in the top right corner. It contains three settings, each with a label, a 'store view' indicator, and a text input field:

- Toll Free Number** [store view]: 1800 102 8080
- Help Email Address** [store view]: <https://appjetty.com/>
- Help Address** [store view]: C/801, Dev Aurum Commercial, Near Anandnagar Cross Roads, Prahlad Nagar, Ahmedabad - 380015,

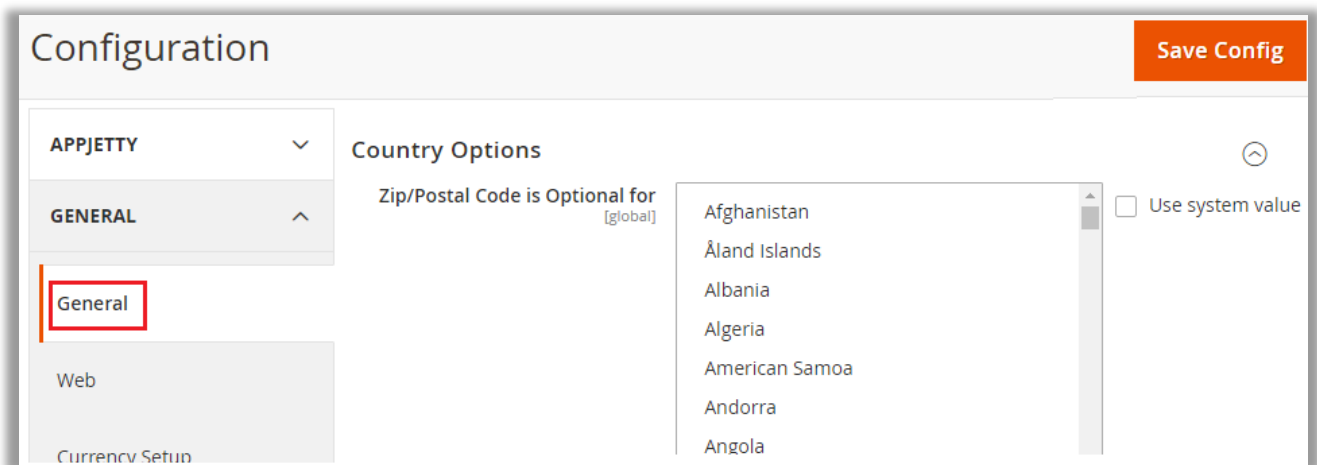

Wish List

- You can enable/disable the Wish List by selecting Yes/No by navigating to **Stores → Configuration → Customers → Wish List**.

Zip/Postal Code & Regional

- At the time of placing the order from the App, by default, the **Zip/Postal Code & Regional** are set as mandatory fields. But you can set it as optional (non-mandatory) fields from the backend for the App users.
- To keep **Zip/Postal Code** as 'optional', navigate to **Stores → Configuration → General → General**. You can select the countries for which you want to make the **Zip/Postal Code** option as non-mandatory field.

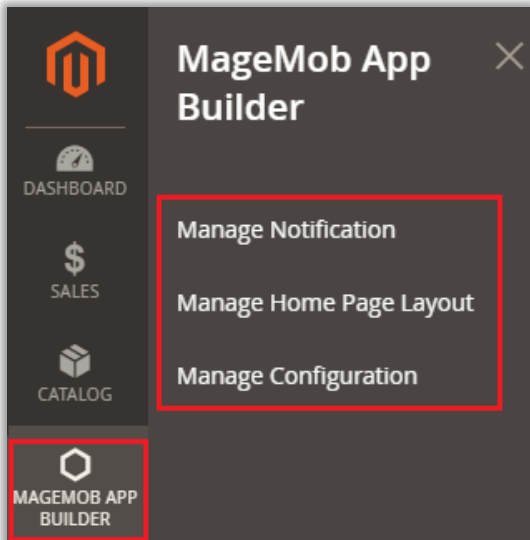

- To keep **State** as 'optional', navigate to **Stores → Configuration → General → General**. By scrolling down, you will find the **State is Required for** option, from here you can select the country for which you want to make the State option as non-mandatory field.

Note: The Wish List, Zip/Postal Code & State configurations are the Magento Default configuration. If you change the configuration that will reflect in the Mobile App and the Website as well.

MageMob App Builder

- Now after Store Configurations, you need to manage the content, layouts and notification for App.

- Go to **MageMob App Builder** to manage the Notification and Home Page Layout.
- By clicking on 'MageMob App builder', you will get the three menus:
 - > **Manage Notification:** To manage the Notifications to send the users.
 - > **Manage Home Page Layout:** To manage the App's Home page with different Layouts.
 - > **Manage Configuration:** Configuration related to the Stores.

Manage Notification

- By clicking on **Manage Notification**, list of Notifications which is already created will be displayed.
- You can create and manage the Notifications from here. You can **Export** all the notification details into a **CSV/XML** file along with searching for a specific notification.
- Users will get the notification on their app based on Notification configuration in this section.

	ID	Title	Send ?	Action
<input type="checkbox"/>	12	50% OFF On Women Handbags	No	Edit
<input type="checkbox"/>	11	Offer Till 31st July	No	Edit
<input type="checkbox"/>	4	Limited offers	Yes	Edit
<input type="checkbox"/>	3	Hurry!! Offers	Yes	Edit
<input type="checkbox"/>	2	Flat 60% discount	Yes	Edit

- You can add a new Notification by clicking on **Create Notification** or clicking on any existing notification that you want to **edit**.
 - You can Add / Edit following fields for the Notification:

- **Notification Title:** Enter the title to be displayed for notification.
- **Choose File:** To add image for notification, click choose file button and select image which you want to upload.

← Back Delete Notification Reset Save and Continue Edit **Save & Send**

Choose OS * Both ▼

- **Status:** Select the status whether to be **Enabled** or **Disabled**.
- **Type:** Select the type for which you want to send the notification. There are **3-types**:

- **Category:** Select a “Category” for which you want to send notification.

Note: You will get the Category list as per the **Catalog -> Categories**.

Type * Category ▼

Choose Category Watches ▼

- **Product:** Select a particular “Product” for which you want to send notification.

Type * Product ▼

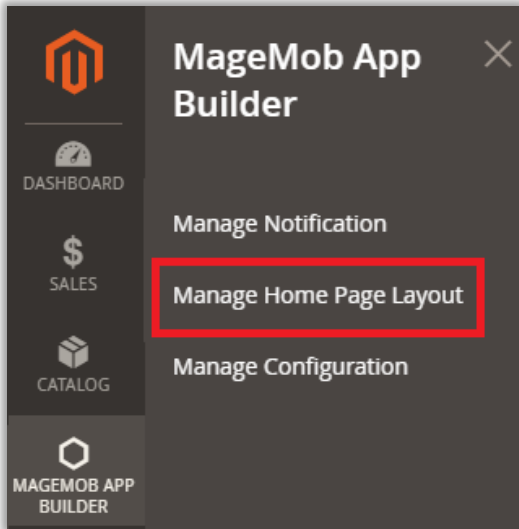

Choose Product Bruno Compete Hoodie-L-Green ▼

- **Offer:** Select an Offer and insert a **URL**.

- **URL:** After selecting Offer type, you need to provide **URL** for notification to redirect users on that page which has notification details.
- **Notification Message:** Type the message for the notification.
- **Choose OS:** Select the OS from “Android”, “iOS” or “Both” for which you want to enable the notification.

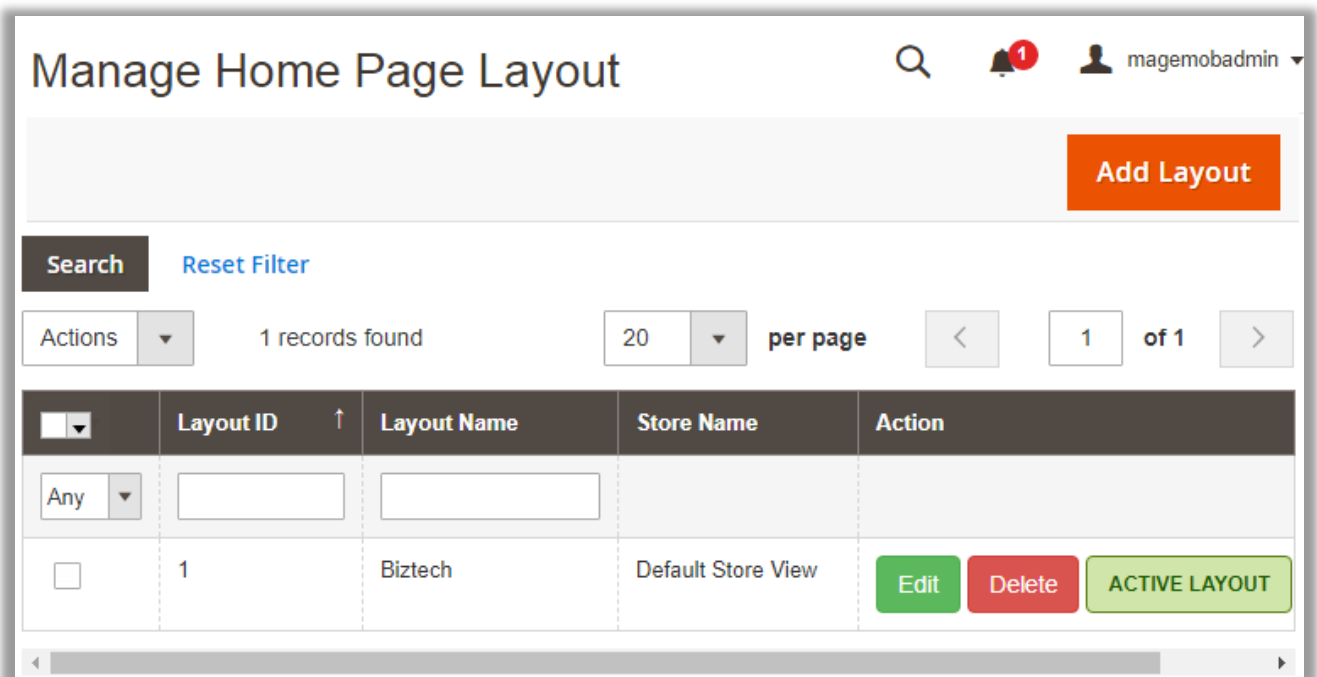

Manage Home Page Layout

- Admin can showcase the products on the App’s dashboard by configuring various blocks from Magento Backend.

- Go to MageMob App Builder -> Manage Home Page Layout.
- You can manage and Add a new Layout.

- By clicking on ‘Manage home Page Layout’, already added Layouts will be displayed.

- You can manage home pages based on your store views.

Note: At a time only one layout can be activated for one store view.

Add Layout

- You can add a new layout as per your need by clicking on **Add Layout** button (top-right corner).
- You must insert the following details:

- **Layout Title:** Enter the Layout title.
 - **Store Views:** Select the Store that you want to display layout in.
 - **Apply This Layout:** By ticking this checkbox, this layout will be applied.
- After inserting all the details, click on **Save Layout** button. As you click on it, the Layout will be displayed in the list of Home Page Layouts.

✓ Layout has been saved.

- Write Review** page will appear after completion of order. (Right screenshot)
- User can share review about purchased product by adding review for product and giving ratings for price, value, and quality of received products.

User Profile

- If user is logged in, the options related to User Profile will be appeared: (Left screenshot)
 > Wish List , > Orders  > Addresses 

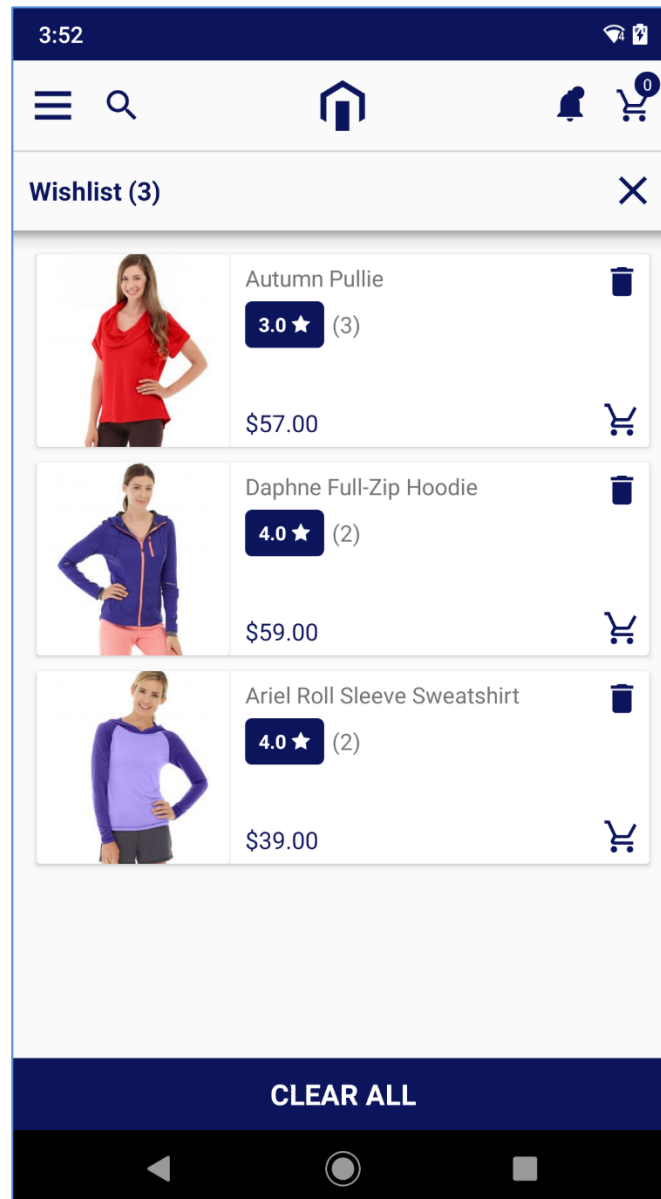

- By tapping on 'edit'  icon, User Profile page will be redirected. (Right screenshot)
- User can check own profile and update the details by tapping 'edit'  button.
- By tapping on key  button, user can update old password.
- User can sign out by tapping Off icon .

Wishlist Screen

- User can manage Wishlist by adding & removing the products.
- The product is added in the Wishlist from the Product listing page *or* from the Product details page by clicking on Wishlist icon .
- You can add to cart by clicking on Cart icon .

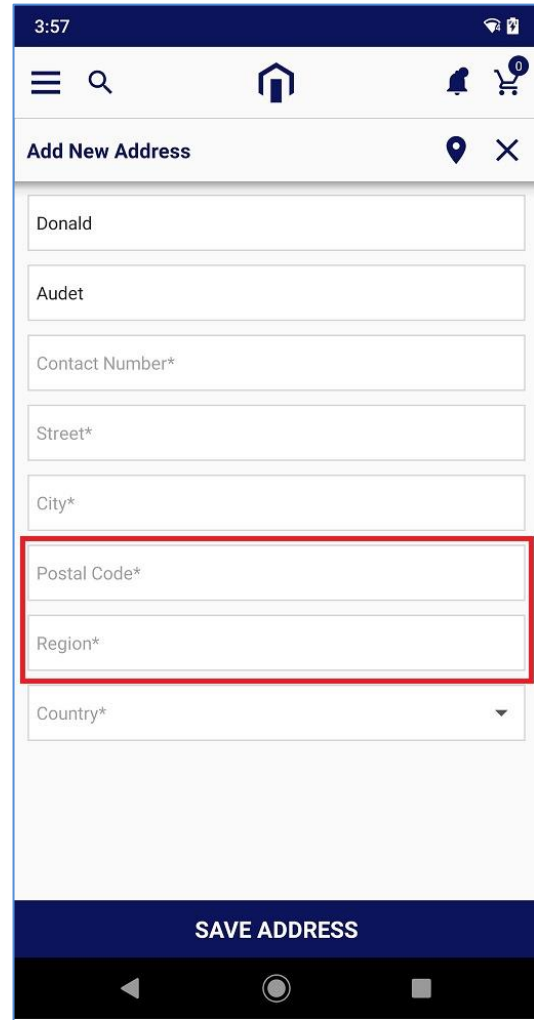

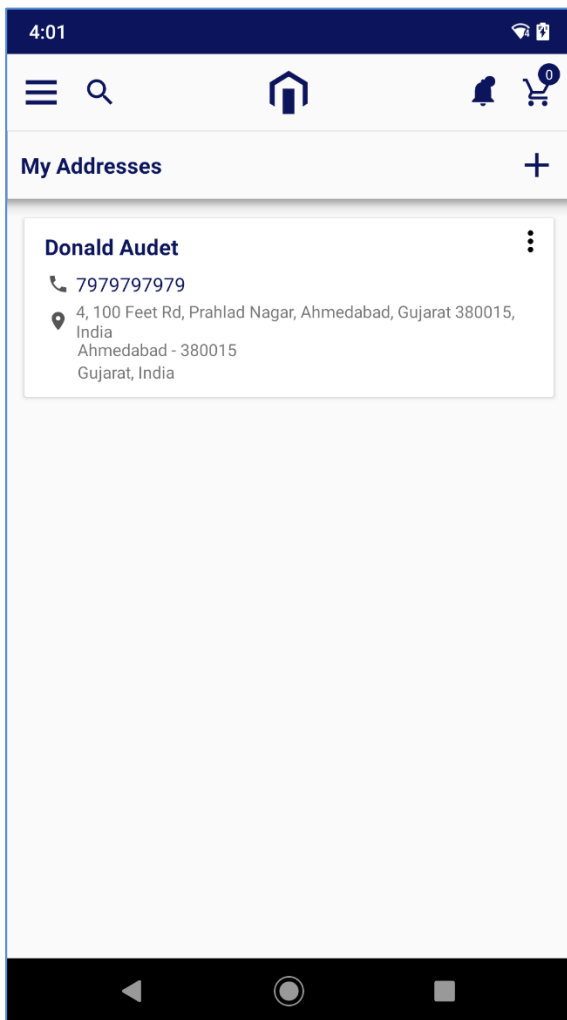

- To clear whole Wishlist, tap on **Clear All** button. All the added products will be removed.

Note: You can make changes to the **Wishlist** option from the backend configuration. For that navigate to Stores → Configuration → Customers → Wish List → Under the 'General Option', you can Enable/Disable the Wishlist option for Mobile app.

Address Page

- User can add address to ship order by clicking on add button on top right corner. Here you need to define address details like street, city, postal code etc.
- User can also manage address by editing or removing saved addresses.

- User can also find address which they want to save on google map by placing pointer to that address. It will fetch directly to defined address fields.

Note:

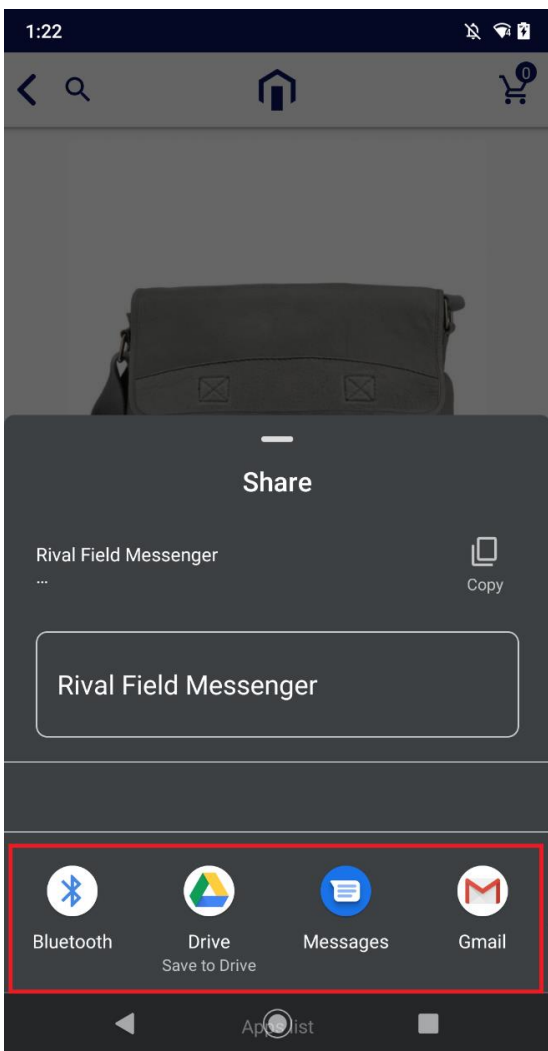

- You can manage the Zip/Postal Code and Region (State) as mandatory or non-mandatory fields based on the configuration from the backend.

Deep Linking (Product Sharing)

- Sometimes Web links don't work with native mobile apps. So, the 'Deep Linking' comes in the picture.

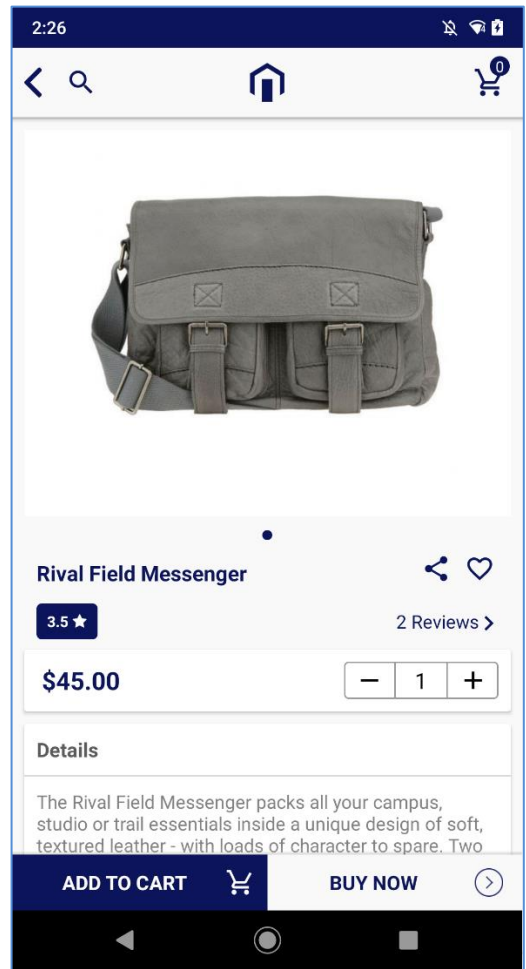

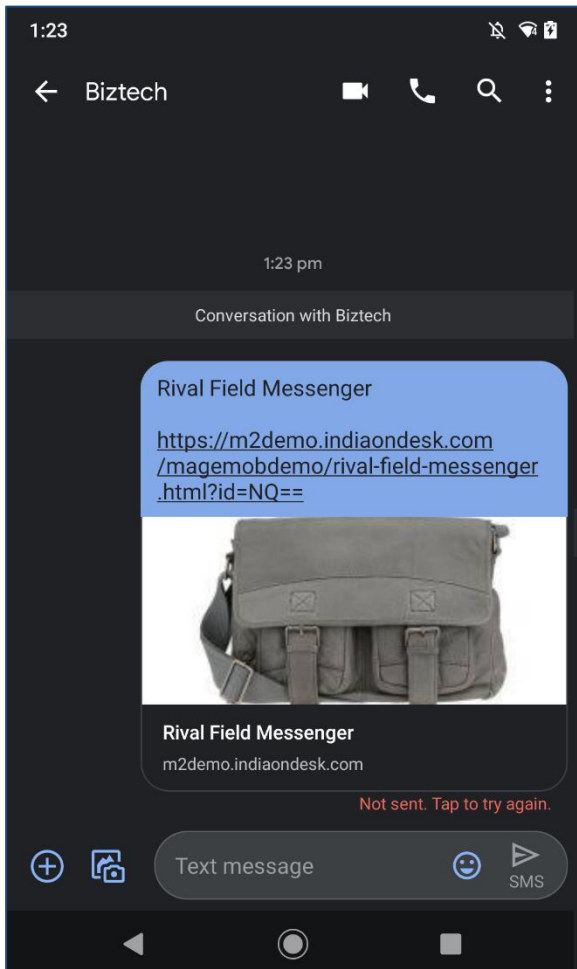

- Deep Links allows mobile app to push to a specific page within an app versus simply opening it.

- If two users have MageMob App Builder application installed on their phone and they want to **share products** to each other, one user shares the product URL from the **sharing** option from the product detail page to the second user.
- A link will be shared via any messenger.

- 2nd User will get that shared product link in messenger. (Left screenshot)

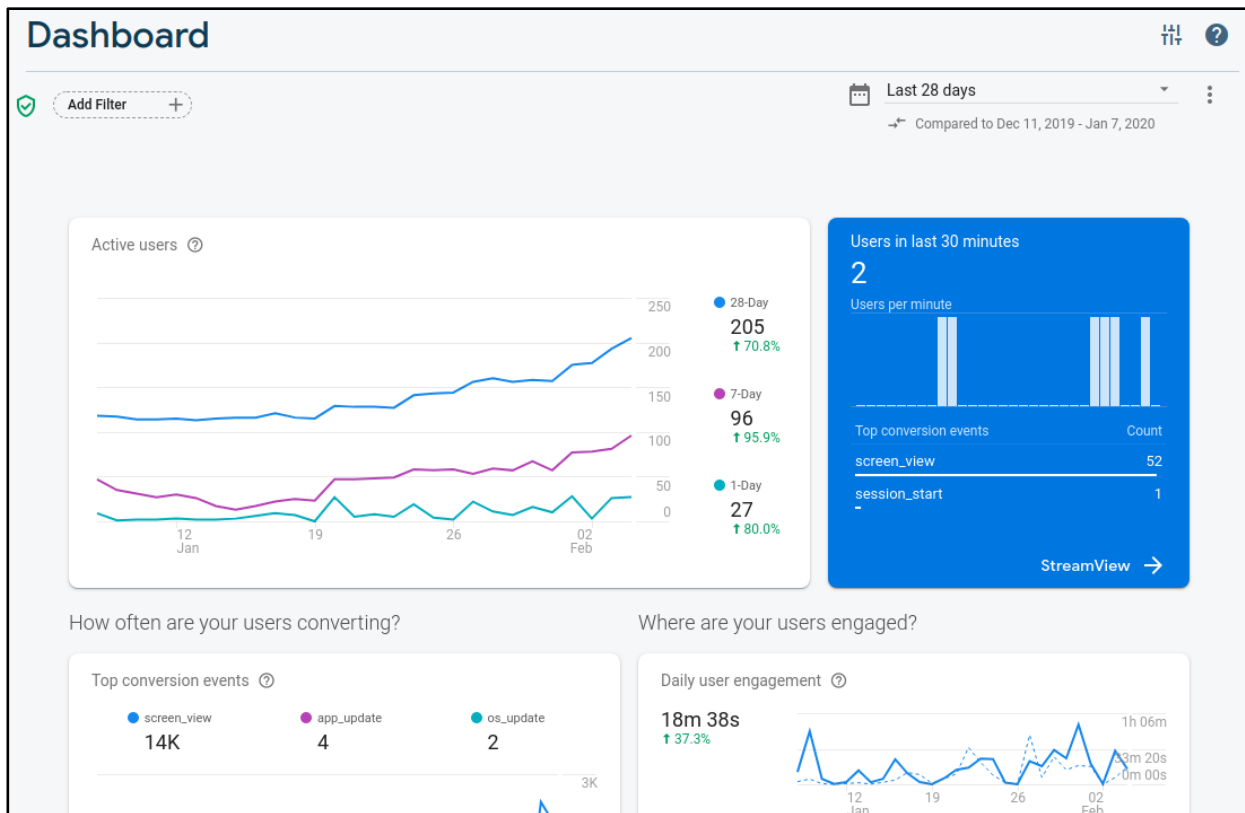

- Now, if 2nd user clicks on the URL which is sent by the 1st user and have application installed on the phone, User will be redirected directly to the detail page of that product in the application. (Right screenshot)

Note: If app is not installed, either it will redirect to the play store *or* open in the web browser.

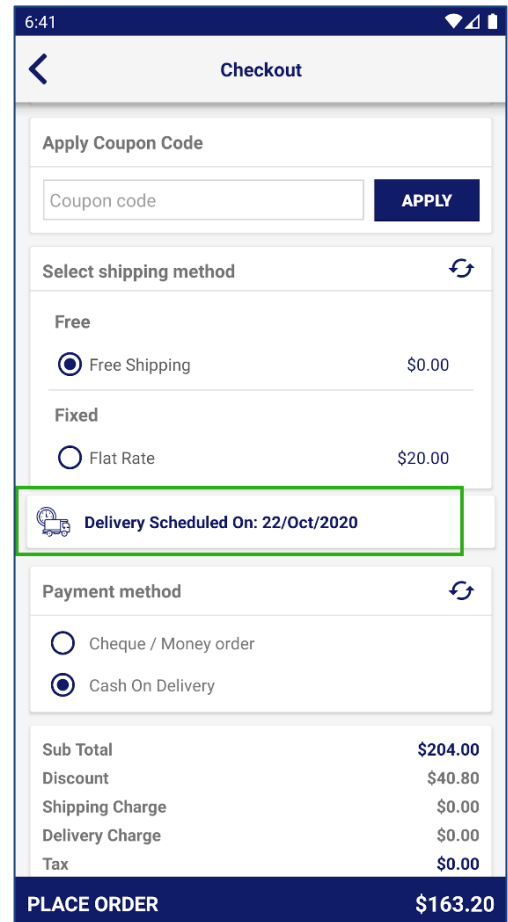

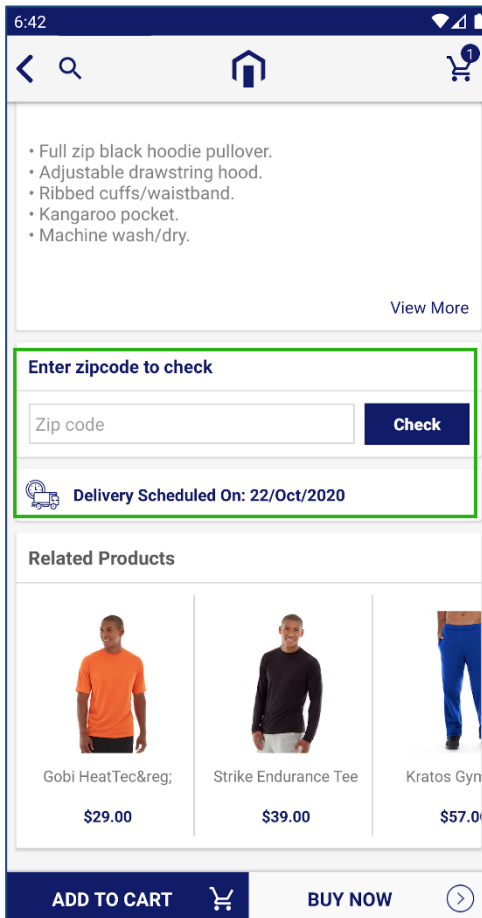

Firebase Analytics

- Admin can track daily user engagement, device details of users, country location and crash analytics as well.
- If any user is facing any crash while using an application, then we can get idea from the analytics report and update the application if required.

Add-ons with MageMob App Builder

- AppJetty’s two extensions are **compatible** with the “MageMob App Builder”:
Zipcode Validator and **Delivery Date Scheduler**.

- Being an administrator, if you are using the “MageMob App Builder”, you can also configure and use the functionality of the **Zipcode Validator** and **Delivery Date Scheduler** in the App Builder app.
- Admin must have purchased the extension of “Zipcode Validator” and /or “Deliver Date Scheduler” for the frontend and enabled the support with MageMob App Builder.
- You can purchase any of them as per your requirement.

Zipcode Validator

- Admin can purchase the “Zipcode Validator” as **add-on** to provide the functionality to the user to check whether product delivery in their own area is available or not.

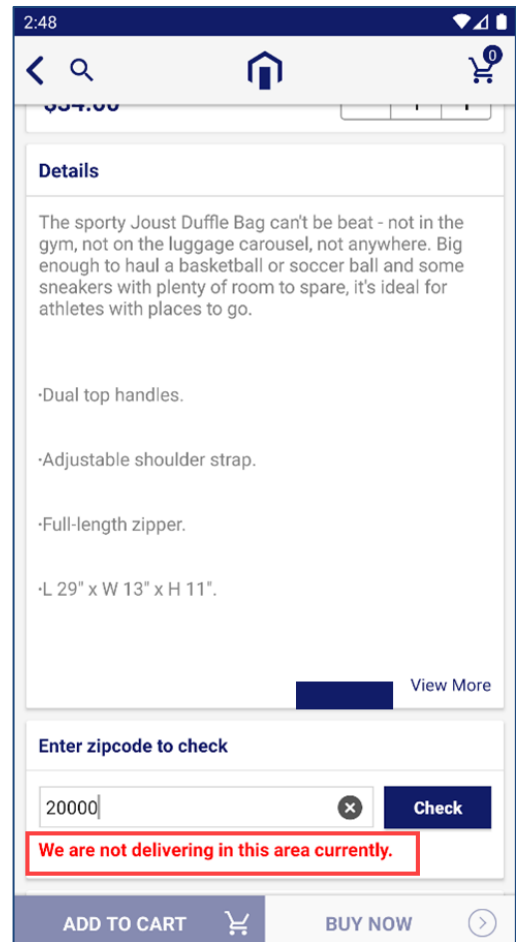

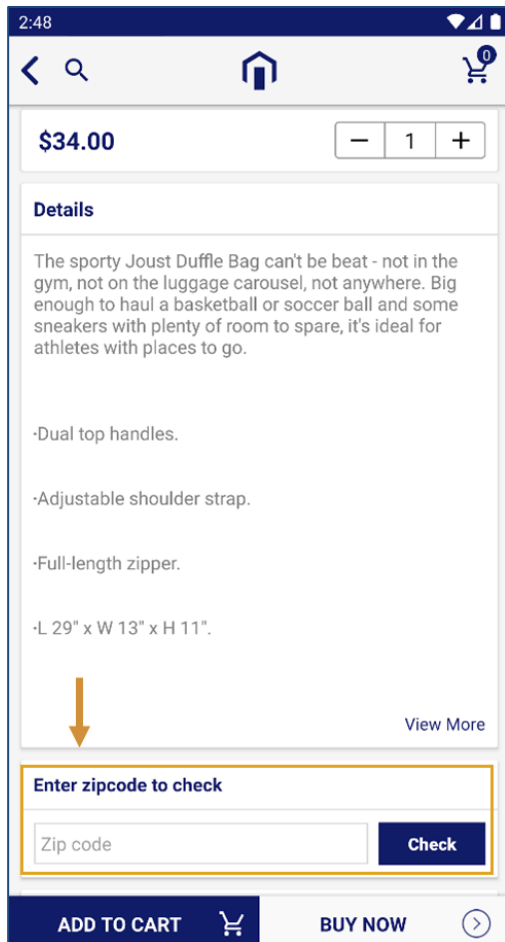

Backend Configuration

- If you have purchased the add-on, you must have the AppJetty’s Zipcode Validator extension configured from the Magento backend. For that, navigate to **Stores → Configuration → MageMob App Builder**.

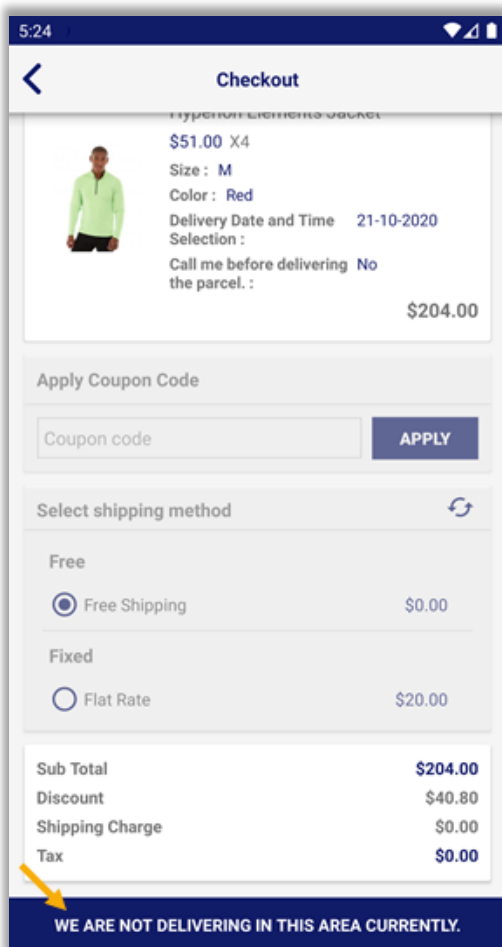

Frontend (App Builder app)

- Once you configured the Zipcode validator and enabled the Zipcode Validator for the App Builder, your customers (the users) will get the Ener Zipcode widget on the Product detail page. (left image)

- Using the Zipcode widget, the user will be able to check the delivery availability by inserting that area’s Zipcode and if there is no availability in that area, they will get the not delivering message else get the availability message. (right image)

Note: The user will get both messages that are inserted in the Zipcode Validator configuration.

- If the product is not available to deliver on the area of inserted Zipcode, your customer will get “Add to cart” button disable during the Checkout.
- If the customer is trying to place an order with the shipping address where delivery is not available, the checkout flow will be disabled and highlighted with the alert message.

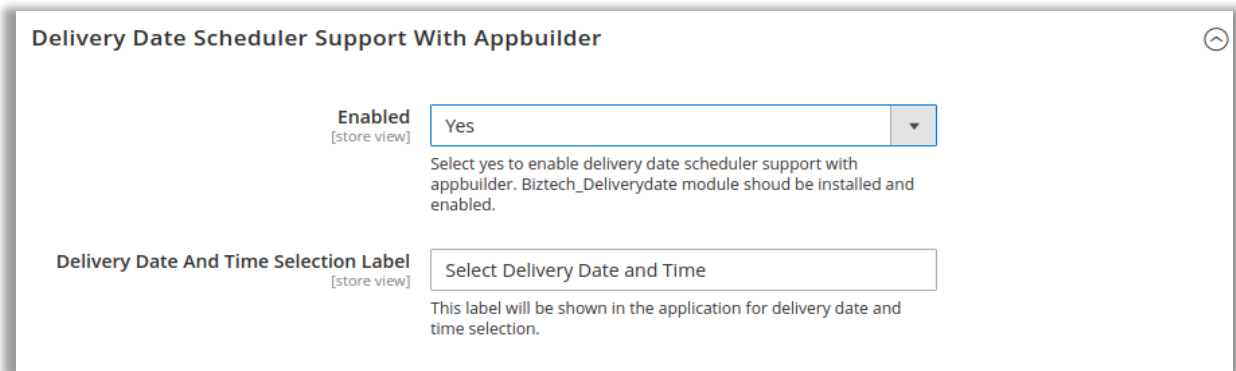

Delivery Date Scheduler

- Admin can purchase the “Delivery Date Scheduler” as **add-on** to provide the date and/or time selection to the user during the checkout of the order.

Backend Configuration

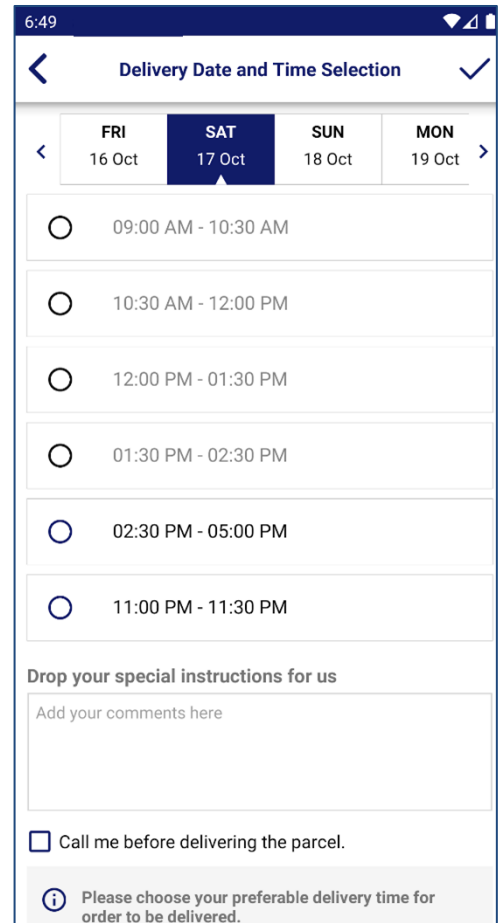

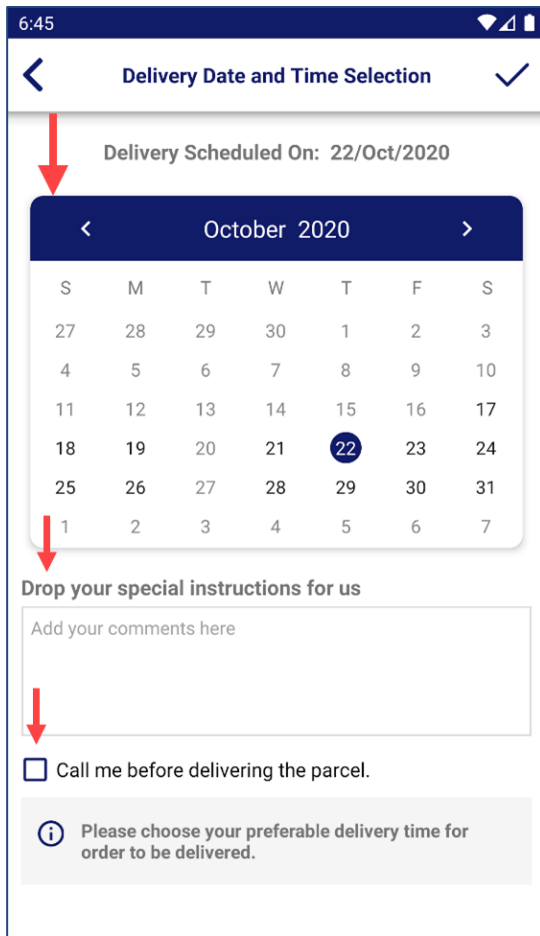

- If you have purchased the add-on, you must have **AppJetty’s Delivery Date Scheduler** extension configured from the Magento backend.

For that, navigate to **Stores → Configuration → MageMob App Builder**.

- **Enabled:** Select **Yes** to enable the “DDS support with the App builder”. AppJetty Deliver date module is also installed and enabled.
- **Delivery Date and Time Selection Label:** You can decide the selection of the delivery date and/or time.

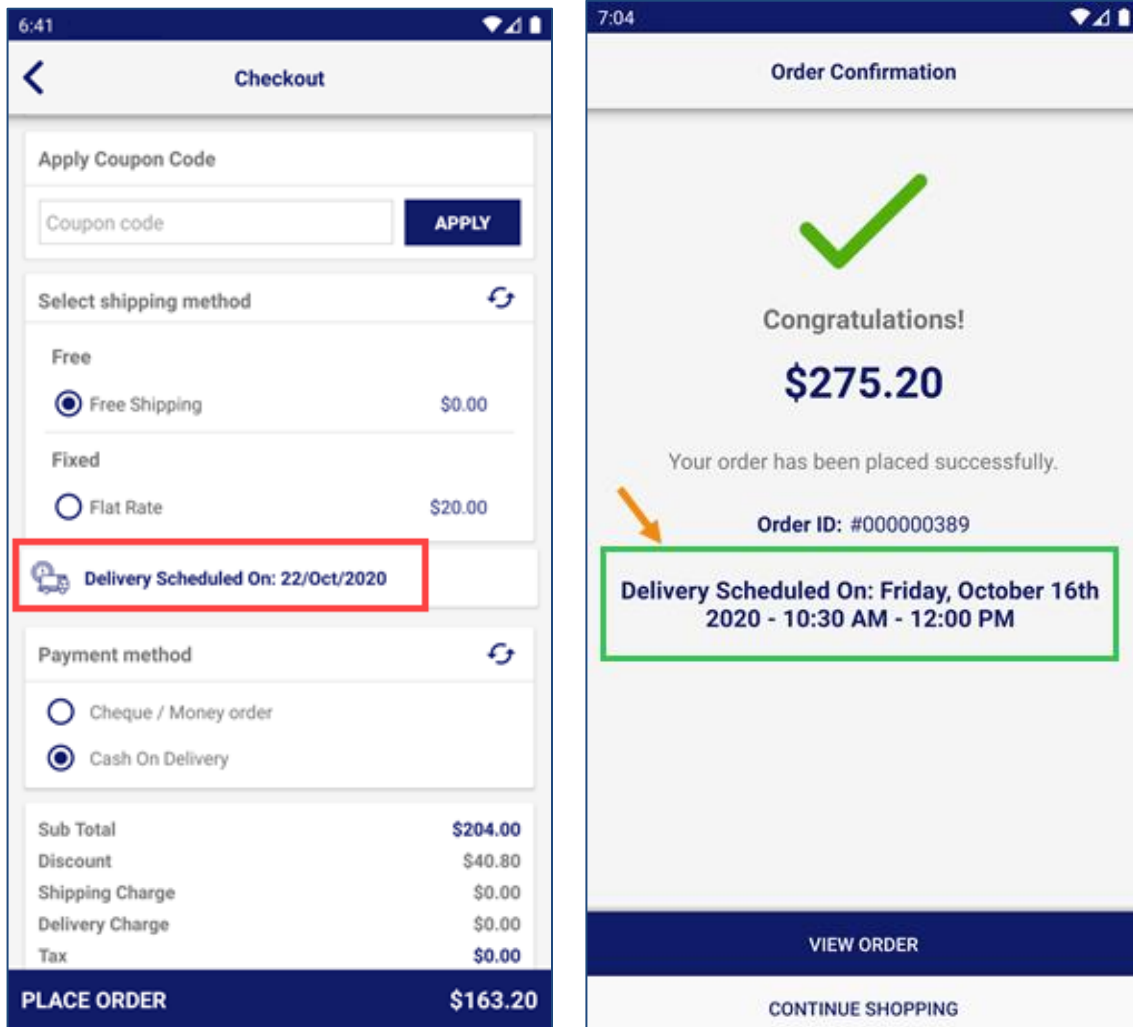

- By clicking on the “Delivery Date and Time Selection”, the customer can select their desired date and time when they want to get the order. The customer can see the available dates on the calendar.
- The customer can add specific **instruction** regarding the delivery and can opt the **Call** option.

Note: Your customers will get details and date/time selection view based on the configuration from the delivery date scheduler by you (admin). (right image)

Order confirmation & detail page

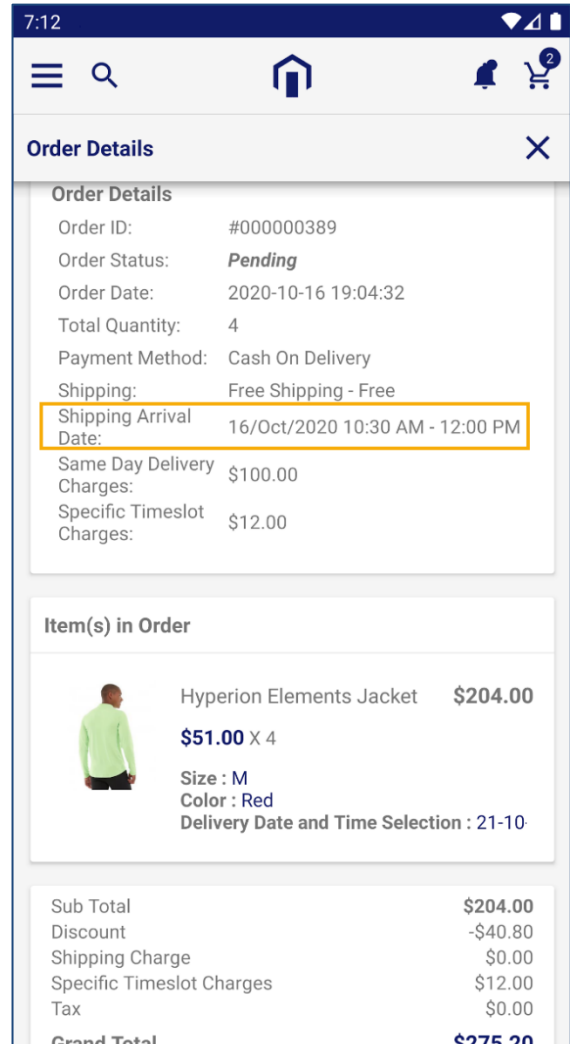

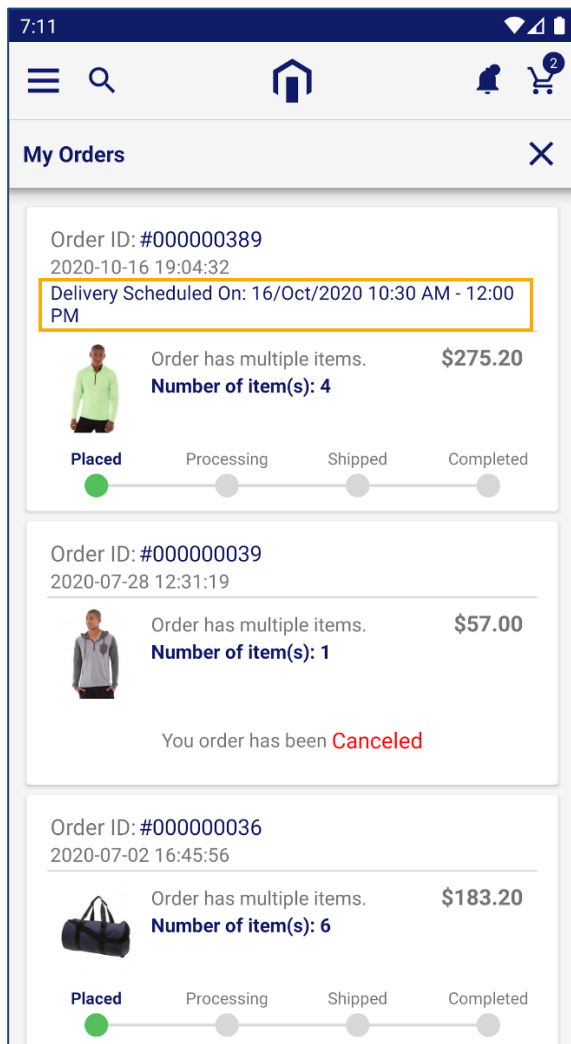

- Once the date and/or time is selected, it can be seen on the checkout page. (left image)

- Once the customer placed the order, they can see the scheduled deliver date on the Order Confirmation page. (right image)

Order Detail page

- The customer can check the placed order details with delivery schedule from the “My Orders”. (left image)

- By clicking on the specific order, the customer can see the Shipping arrival details, delivery charges and other details. (right image)

Points to Note

- Products in all the modules of MageMob App Builder will only be visible if they are assigned to the website selected while purchasing the Extension.

- You can try our MageMob Mobile App Builder demo app from Play Store or App Store.
- **App Store link:** <https://itunes.apple.com/us/app/magemob-cart-customer-mobile/id1039362898?mt=8>
- **Play Store link:**<https://play.google.com/store/apps/details?id=com.biztech.magemobcart>
- You will require the active extensions of AppJetty's [Zipcode Validator](#) and [Delivery Date Scheduler](#) to be compatible with App Builder.
